RE: Case No. 2006-00361

After the Informal Conference of the June 16, 2006 burn accident that occurred on our system, training of the accident has been conducted. All OEC field employees and contract line personnel, Bowlin and Davis H. Elliott, were trained on the specifics of how this accident occurred. They were trained on the safety rules that were broken that contributed to this accident taking place. The results of the accident were shown and discussed with participants and it was stressed to them that safety inspections will be done at least monthly. This training program was also presented at the KAEC Safety Coordinator's Conference in Bowling Green on Dec 8, 2006. Approximately 30 Safety Coordinators from various Cooperatives were in attendance for the program. After presentation at the conference the program was distributed to personnel at each Cooperative so that they could train their employees on this accident. I know this was discussed in the Informal Conference but was not mentioned as a corrective action in the PSC report to us. Wanted to let you know that we had moved on with this action.

Sincerely,

A handwritten signature in black ink that reads "Tony Dempsey". The signature is written in a cursive, flowing style.

Tony Dempsey
Manager of Safety
Owen Electric Cooperative
