Re: Louisville Water Pipeline

RECEIVED  
NOV 21 2007  
PUBLIC SERVICE  
COMMISSION

2007-00134

I am very much **opposed to the KAW water pipeline** going through Scott County as it will unnecessarily take precious Scott County soil , burden ratepayers, invade our environment ,while serving **NO PURPOSE** for Scott County.

The **Louisville Water Company** , already approved by Frankfort's Mayor and Fiscal Court, **can serve at the most economical and direct route to Fayette County** without and invasion of surrounding counties.

With our **uniting** and some **good planning** we can propose a plan that will solve our water problem for generations to come with a lot **less financial burden** for all of us. Remember: **Georgetown already has a water line to Frankfort and so far it is working in our best interest.**

Please **don't** put a **bandaid** on this problem! **Time** is of the essence!. The **rush** is on! **Water** is the new **Gold!**

Respectfully'
