

e 2007-00134,

believe that Kentucky American Water's proposed  
ool 3 on the Kentucky River to Newtown Pike in Fayette  
ast cost solution to the water needs of Central Kentucky.  
do not believe that a private for-profit company should  
ully from the destruction of my property or my neighbor's

zens of Central Kentucky deserve a long-term solution to  
ds. Utilization of a larger water body, such as the Ohio  
ong existing utility corridors makes the most sense  
environmentally, and aesthetically.
