PUBLIC SERVICE
COMMISSION

**RE: Kentucky American Water
Case 2007-00134**

We appreciate the commission addressing the water supply issue in Central Kentucky.

In Scott County we have a long history of supporting the Scott County reservoir as a solution to our local water problems, and is still our preferred option.

We are concerned about the proposed Kentucky American Water pipeline because of the burden that it places on Scott County residents in the destruction of land and taking of property.

We understand that there are other options that would not impact our citizens as severely, we ask that you fully and fairly explorer those options.

Mantha L Leer

Respectfully,
