*Case No. 2007-00134*

Dear Mr. Melnykovich,

I am a property owner along the southern route of the proposed treatment station and waterline that will be starting from Monterey, in Owen County, thru Franklin, Scott and into Fayette County.

I am opposed to the route proposed by KAWC. This is by no means the most cost effective, nor does it offer any long term fix for the water shortage that is faced by each and every citizen of Central Kentucky. I have read many different reports that seem to contradict what is being told to us by KAWC as to the most cost effective route. I think there are other alternatives, such as the Ohio River and talking to the Louisville Water Co. I think it would be the least costly and be less invasive to the land and people, to take the route from Louisville along I-64.

In conclusion, I hope that the people of Central Kentucky will be listened to and their elected representatives will think about the long term effects and their communities and their supporters.

With Regards,

Penny Greathouse

Midway, Kentucky 40347
