COMMENTS: Dear Sir,

While we are not really members of this
organization, we all have the same concerns.
The proposed water line would come all
the way across our farm. We have 250 acres
of prime land in Peaks Mill. We have a
family farm and it has been in this family
for about 70 years. Together with our 2 sons
and their family we have worked & paid for
this farm. It saddens us to think we would
have no control over this trespass on our
property - Especially with what seems to be
another excellent option. The I-64 plan.
It seems the pipeline would sometime have to
go to the Ohio River anyway. Why not start
there? Please consider all the options and
the citizens plea for the alternate route.
Thank you so much.
