Auto forwarded by a Rule

Sir.

I would like to offer my support to the solution that includes building a water treatment plant at lock 3 and then pipes treated water up to Ironworks pike. Additionally, as a part of the total regional solution, we need to also have the regional water districts included in the Bluegrass Water Supply Commission to be connected to offer the most stable supply of water to the region. This issue has been studied thoroughly and the recommended option is the one described above. We simply do not have time to investigate new plans like the Louisville water pipe plan. It is not a better plan and needs to be disregarded quickly so that we can move forward.

This plan needs to be approved, funded and build most expeditiously. I am concerned about our water supply now and in the near future. I am very concerned about our region not being prepared for the 2011 World Equestrian Games should we experience a drought similar to the one we are experiencing this summer and how Central Kentucky will look in the worlds eyes should we find ourselves experiencing a water interruption during that time.

Again, please do everything in your power to approve this plan. It is extremely important to the Central Kentucky region.

Thank you in advance for your support,

Rob Garrison
