Mark D. Goss, Chairman
Public Service Commission
P. O. Box 615
Frankfort, KY 40602

Re: Case No. 2007-00134
Kentucky-American Certificate
of Convenience and Necessity

Dear Chairman Goss:

Attached please find the resolution of the Spencer County Fiscal Court asking the COMMISSION to consider the needs of all of central Kentucky by requiring Kentucky-American to construct a pipeline to connect to the Louisville Water Company at Shelbyville. Solving all of central Kentucky's water woes, not just Lexington and Kentucky-American's, is the charge of the Public Service Commission.

A pipeline connection to Louisville meets the long term needs of the entire region, including Spencer County, enhances the drought-proofing needs, protects against localized catastrophe should something happen to the Kentucky River, is cost effective for the ratepayers and will do a minimum amount of damage to the environment. This solution does not extend the wasteful duplication of services mantra that Kentucky has been so wont to continue.

Thank you for asking for input from the entire region. This decision will have impact on the region for 30-50 years.

David Jenkins, Spencer County Judge Executive

Spencer County, Kentucky
Resolution No. 4
Fiscal Year 2008 Series

WHEREAS, Spencer County Fiscal Court desires for the residents of the County to be provided a safe, secure, stable and quality water supply; and

WHEREAS, to this end Spencer County Fiscal Court has been presented various proposals to ensure that the County residents are provided a continuing safe, secure, stable and quality water supply, and the Spencer County Fiscal Court has reviewed the proposals submitted to the Court and being fully apprised there from,

NOW, THEREFORE, BE IT RESOLVED that:

1. The Spencer County Fiscal Court supports a water supply strategy that includes access to water from the Ohio River, the largest river east of the Mississippi , for the reason that this access will provide protection against drought, and will protect against interruption of the public water supply due to circumstances that may make the Kentucky River unusable or unavailable for periods of time.
2. The Spencer County Fiscal Court opposes the construction by Kentucky American Water Company of a large pipeline through western portions of Scott County and the northern portions of Franklin County, and the associated water production facilities along Pool 3 of the Kentucky River, under the terms of that pipeline proposal currently under application with the Kentucky Public Service Commission in Case No.2007-00134. The Fiscal Court is of the position that the proposed construction will be unnecessarily burdensome on citizens of Central Kentucky, and will unnecessary duplicate available water supply facilities that the Louisville Water Company has indicated it can supply to Central Kentucky at a rate of ninety-five (95) million gallons per day of treated water.
3. The Spencer County Fiscal Court supports and urges discussions between all interested parties, including Kentucky-American Water Company, the Lexington Fayette Urban County Government and Louisville Water Company, regarding a connection between these two major regional water supplies so that there will be ample, reliable, safe and quality water supplied in a timely manner to Spencer County, Kentucky and the central Kentucky region.

DONE this 15th day of October, 2007, at Taylorsville, Kentucky,

Attest:

Spencer County Fiscal Court Clerk

David Jenkins, County Judge/Executive
