PUBLIC SERVICE  
COMMISSION

This is in regards to Case # 2007-00017.

I have no objections to the tower being built at this location, except the fact that I have been told that regulations require the tower to be 500 feet from a residence.

I see from the map that there are two residents that are not 500 feet from the proposed tower.

I would like to see the tower to be located at least 500 feet from my neighbors residence.
