the utility will immediately determine the period during which the error has existed, and will recompute and adjust the customer's bill to either provide a refund to the customer or collect an additional amount of revenue from the underbilled customer.

- c) The utility will readjust the account based upon the period during which the error is known to have existed. If the period during which the error existed cannot be determined with reasonable precision, the time period will be estimated using such data as elapsed time since the last meter test, if applicable, and historical usage data for the customer. If that data is not available, the average usage of similar customer loads will be used for comparison purposes in calculating the time period. If the customer and the utility are unable to agree on an estimate of the time period during which the error existed, the Public Service Commission will determine the issue. In all instances of customer overbilling, the customer's account will be credited or the overbilled amount refunded at the discretion of the customer within thirty (30) days after final meter test results. A utility will not require customer repayment of any underbilling to be made over a period shorter than a period coextensive with the underbilling.
2. Meter read failure. When a meter has ceased to register, or a meter reading cannot be obtained, the quantity of water to be billed will be based upon an average of twelve-months' consumption. If said meter readings are not available for an entire twelve-month period, the water bill will be estimated by the utility, subject to an upward or downward adjustment once a twelve-month average of actual meter readings can be calculated.

2. Other extensions:

- a) When an extension of the utility's main to serve an applicant or group of applicants amounts to more than fifty (50) feet per applicant, the utility may if not inconsistent with its filed tariff require the total cost of the excessive footage over fifty (50) feet per customer to be deposited with the utility by the applicant or the applicants, based on the average estimated cost per foot of the total extension.
- b) No water distribution main extension shall be constructed or connected to the District's water distribution system without first obtaining the District's approval.
- c) The provisions of Administrative Regulation 807 KAR 5:066, Section 11(2)(b) shall govern refunds for any water distribution main extension that an applicant or group of applicants constructs and donates to the District.
- d) Any person who desires service from the proposed water main extension shall execute a written agreement with the District to pay his or her share of the required customer contribution for the water distribution main extension and to agree to take water service for a period of not less than one (1) year beginning no later than six (6) months from the date of the water distribution main extension's completion. The written agreement shall provide that the applicant shall have the right to rescind the written agreement at his or her option, if the projected final cost of the extension exceeds the preliminary estimate provided at the time of the written agreement's execution.
- e) Upon determining the final cost of the extension, the District shall advise in writing each person who has executed a written agreement of his or her required contribution. This customer shall have thirty (30) days from the date of the notice to pay his or her contribution and tap-on fee. If any applicant who has executed a written agreement regarding the main extension elects to rescind his or her agreement or otherwise fails to comply with the terms of the written agreement, the District may cease all extension
