Executive Director's Office PUBLIC SERVICE COMMISSION Feb. 22, 2007

I am writing about my concerns on the tower that is going up close to my home. I am concerned that it will cause problems with my health, and other things around my house, such as my cable, my phone, and the tower attracting lightning when storms come near my home and cause power outages. I am concerned about my animal that are outside and what effects it has on them and also on my garden.

I have researched on the Internet and see that what is presented is not conclusive. But even though its not conclusive, I still have these concerns.

I was also wanting to know why the access road is where it is? When it rains or snows the water runs off of that road and onto the blacktop road with gravel on then freezes when cold, making our main road hard to go up and down on.

I would like for this letter with my concerns to go on Record. If their

are any problems with these concerns
after the tower goes up, then I will
have already sent my concerns for
problems with this tower being
built in my community so that
you will be able to decide what
needs to be done if any of these
problems occur.

Thank you
Orbutis Faye Antonikowski
