PUBLIC SERVICE  
COMMISSION

Dear Sirs:

In regards to the rate increase at Paradise Valley Sewage Treatment Plant, I don't think we should have to pay for something that the State has known was bad since the early part of the 1980's. That is when we started complaining to the State, the power had been cut off and it hadn't run for almost two years. They would send someone out to check it but nothing was ever done. It has backed in houses and on property that we have had to pay for out of our own pockets. We have had three rate increases since it was put in and five owners. What happened to all the fines and bonds that were levied on them, I think those should be used to fix the ones that are fixable. We were told at a meet that they are going to close two possibly three so are we paying for their closer? Will all rates go down after they are closed if not I don't think we should have to pay anymore let the State fix the mess that they made.

Thank you,  
Brenda & Barry Lewis
