re: Case No. 2007-00134  
Kentucky-American Certificate  
Of Convenience and Necessity

Dear Chairman Goss:

Attached is our Resolution No. 2007-005 supporting a pipeline to Louisville as a means to provide our community with adequate water supply at a reasonable cost.

This decision is important to ALL of Central Kentucky and it is critical that leaders make careful deliberations as we must be accountable to our tax payers.

We wish you well in your discussions.

Yours truly,

Steve Eden, Mayor

CITY OF SIMPSONVILLE  
RESOLUTION NO- 2007-005

WHEREAS, City of Simpsonville desires for the residents of the City to be provided a safe, secure, stable and quality water supply; and

WHEREAS, to this end the City of Simpsonville has been presented various proposals to ensure that the City residents are provided a continuing safe, secure, stable and quality water supply, and the City has reviewed the proposals submitted to the City and being fully apprised there from,

NOW, THEREFORE, BE IT RESOLVED that:

1. The City of Simpsonville supports a water supply strategy that includes access to water from the Ohio River, the largest river east of the Mississippi, for the reason that this access will provide protection against drought, and will protect against interruption of the public water supply due to circumstances that may make the Kentucky River unusable or unavailable for periods of time.
2. The City of Simpsonville opposes the construction by Kentucky American Water Company of a large pipeline through western portions of Scott County and the northern portions of Franklin County, and the associated water production facilities along Pool 3 of the Kentucky River, under the terms of that pipeline proposal currently under application with the Kentucky Public Service Commission in Case No. 2007-00134. The Fiscal Court is of the position that the proposed construction will be unnecessarily burdensome on citizens of Central Kentucky, and will unnecessary duplicate available water supply facilities that the Louisville Water Company has indicated it can supply to Central Kentucky at a rate of ninety-five (95) million gallons per day of treated water.
3. The City of Simpsonville supports and urges discussions between all interested parties including Kentucky American Water Company, the Lexington Fayette Urban County Government and Louisville Water Company, regarding a connection between these two major regional water supplies so that there will be ample, reliable, safe and quality water supplied in a timely manner to Shelby County, Kentucky and the central Kentucky region.

DONE this 21<sup>st</sup> day of October 2007, at Simpsonville, Kentucky.

  
Steve Eden, Mayor
