Still opposed to KY AM Water's "Central Kentucky Solution"

All,

I am still adamantly opposed to KY AM Water's "Central Kentucky Solution." I hope some local communities drive a stake into the heart of their "solution," but realize the fear and back door politicking has affected many judgments.

I have come to know the conscientious nature, and peoples, concerned with the local damage to environments in Scott, Franklin, Owen and Carroll Counties. Their honesty and representation has consistently been admirable.

However, the KY AM Water "Central Kentucky Solution" is nothing more than a continuation of a big lie in order to gain huge profit at the expense of ratepayers. The estimated \$173 million accumulative difference in price for water over 20 years to the alternative Louisville Water pipeline is real, and serious, threat to all customers.

This "Central Kentucky Solution" is also a selling point to a potential buyer, if RWE, the parent owner, gets out of the business soon. Additionally, this is a reason for the purchase price to be even HIGHER. That higher price of investment could make water prices that much higher as well.

Drive a STAKE in the heart of this vampire, KY AM Water's "Central Kentucky Solution."

It is a fiscally, environmentally and moral position to take in a world of greed.

Sincerely,  
Don Pratt
