To whom it may concern,

I support the Ky American Water Supply project/2007-00134. I am willing to take an increase on my water bill to support this project. I would rather pay a higher

water bill and have a sufficient supply of water for my kids than wait on Louisville to put together something that may or may not work for our community. I have seen some of the plans for the Ky American water project and had the project explained to me. Ky American is ready to begin work and Louisville is not even close. We need a solution right away. Look at the people in Georgia, honestly how much warning do we need?
