**Auto forwarded by a Rule**

Received information by Kentucky American Water Company to build a 31 mile pipe line and a filtration plant. We do not have a problem with the concept if this will solve what could be a major problem in the future.

Prior to this proposal their was talk about a line to Louisville and we believe use their filtration plant and add pumping station along the route with water access to smaller communities along the route.

Has this been dropped or is this the first phase?
