Case: 2007-00134

COMMENTS: _____

I recently biked the proposed KANS pipeline route in Northern Franklin County. The route is very scenic. I think it should only be disturbed in the case of extreme public necessity.

I do not live along the proposed route. I live in Western Franklin County. I travel the I-64 corridor on regular basis. It seems to me to make more sense to use the 64 corridor since a public right of way already exists.

Public Service Commission exists to protect the public in instances like this. You must determine whether this private utility is abusing the public trust. I do not have all the facts. But I ask you act wisely in considering all the facts. I would prefer to preserve the beauty of Northern Franklin County.

Don Stosberg
