COMMENTS: I am opposed to the pipeline
going over & on to the Ohio River.
We need to implement water conservation.
We are incredibly wasteful with all our
resources and especially water.
With the global warming that we are
experiencing no matter how many pipelines
we put in we will not experience
relief until we learn to be extremely
conservative with this precious resource.
If we want more water we must
plant more trees to return our
ecosystem to the natural ~~the~~ hydrologic
system that gives us water from
the clouds that ultimately are the
breath of trees and the precipitor of
percipitation.
This is a greedy, short sighted plan.
as most plans are in America.
A resource that is essential for life
should be more equitably shared and
not part of blatant Capitalism.

Jane Harrod
