Regarding Case
2007 # 00134

Gentlemen:

I am a resident of Scott Co. and am concerned about the Kentucky American Water proposal before you at this time. This concern relates to the disturbance that will happen when the proposed underground water pipe line is construction takes place and the permanent damage it will do to Scott, Owen and Franklin counties. Going across country can be avoided if Kentucky American would partner with the Louisville Water Company and draw water from the Ohio River rather than continue to deplete and finally destroy the Kentucky River. We need long range plans that are realistic and affordable that will give us long term drought protection far less than just one part of the Kentucky American plan.

Yours Truly,
Mary Dan Price
