COMMENTS:

I am opposed to the construction of the KAW line from the KY River in Franklin Cnty to Lexington. It doesn't seem rational to pump so much water out of the KY River when it could be done more efficiently from the Ohio River.

I fear that in instances of a drought, such as this year, water may be limited in the KY river. As a farmer I depend on this water for irrigation in dry years. It would be less impact on all concerned parties if the water was pumped from a source like the Ohio River which is much larger.
