Case: 2007-00134

COMMENTS: The egotism of Kentucky
American is disgusting. You'd have to
go to Easter Island to find bigger heads.
MT is sheer arrogance to propose a plan
that puts money and KA's lust for it
first, and puts respect and reverence for
the natural world dead last. I am
trying to read depth into KA's plan
but end up hydroplaning. Got the KA
planners in their clean suits and
slick smiles right in back of the earth
movers & bulldozers to see the debris,
the mess of broken roots and habitats.
Make them take careful inventory of small
creatures crushed in their homes, of
turtles broken, of lives (not worthy of
KA's consideration) destroyed. The land,
the creeks, the animals and our children's
future all depend on the health of the
natural world. If KA's water plan is
wise and worthy, then fairy tales are facts.
