Case: 2007-00134

COMMENTS: Dear Commissioners:

Please do not consider the Kentucky American Water Plan. I am directly in the pipeline path. Since I bought the park-like 10 acres in 2001, I have spent thousands to plant native trees + shrubs to enhance the existing natural wildlife refuge. Five acres of this is now completely devoted to a bird sanctuary, including a temporal bog and stream which would be destroyed by the pipeline.

I told a very kind representative from Kentucky American about the wetland and my plans for it. She told me my property would not be disturbed. I am not sure how it could not be harmed unless they laid the pipeline on Summer Wind Farm across the road. To do that would destroy at least twenty ~~ser~~ red oak trees planted by Summer Wind. The beauty of the area would be obliterated.

So much of the area's natural beauty and value to people and wildlife would be destroyed by the Kentucky American Plan. Much less would be harmed by the Louisville Plan. Sincerely, Julia R. Swords
