PUBLIC SERVICE
COMMISSION

Dear Sir. I am a 74 year old

Widow & Legally Blind - I am sure I will not

be around to see the results of decision by PSC

on the proposed of Key Concern Note to build a

Treatment plant on Key Run at US 66 #3 to finish.

Notes to Contact Key. Key Commission does not include cost

of additional Pipeline from road 3 to the

Livingston Co I am sure would be needed almost
from the beginning Jack's point is 23 miles up river from

Track #2 and extends north but only from up river
not from 2 creeks S & AT CREEK & S & K Horn Creek

1/4 T-M & DROUGHT there is no flow from either of these 2

Creeks & during dms would not help - if it became

Necessary to pump 20 or 25 million gallons of water
from Pond 3 I would guess it would be dry in

a week or two hence a need for the water
No one has mentioned the cost for water pumped to keep
the pipes clean pumps in working order but water works must
be compelled to pay monthly fees for water they did not
need or use - How much per customer - I would guess
at least \$6.00 or \$10.00 a month - While I am writing
I have read in papers each afternoon near my P.S. &
and find in each case the public utilities always ask for 3

Some 1/2 hr more they receive - I am sorry about
my housewarming but wanted to get in my 29
birth cost was under \$100 about your recent 30th happy
in Jarkent

Love. only yours

Wm - R. Grant
