Dear Chairman Goss:

I am writing to express my full support of the Kentucky River Plan. As you are well aware, many other plans have been considered, and the Kentucky River Plan solution seems to be the only logical answer to the region's water supply crisis.

It is my understanding that this solution could be in place by 2010. Given the current water supply situation and the additional demands due to the upcoming World Equestrian Games, time is of the essence.

Prior to my position as State Representative of the 74th District, I was mayor of the city of Jeffersonville. During my tenure as mayor, we switched to Cave Run water. Though our project was on a much smaller scale, I learned a great deal about the demands of increasing water supply. We realized that it is better to be proactive than reactive. The Kentucky River Pool 3 has enough water to serve Central Kentucky until the year 2030 and even beyond. Given the facts and the demand, I can see no reason why this plan should not be given immediate approval.

Please feel free to contact me. The Central Kentucky Solution has my total support.

Sincerely,

A handwritten signature in cursive script that reads "Richard Henderson".
