JAN 16 2008
PUBLIC SERVICE
COMMISSION

Dear Mr. Goss:

This past year's severe drought in the commonwealth, and the dramatic shortages in water supply we have read about throughout the southeast are ever-present reminders that now is the time to secure a reasonable, cost-efficient solution to our region's water supply.

I want to affirm the need for the Kentucky Public Service Commission to determine what is in the best long-term interest of the citizens of Central Kentucky as it relates to the water supply deficit and emphasize that time is of the essence. More than two decades of study have been performed. More than 40 ideas, plans, and alternatives have been considered by the Bluegrass Water Supply Commission in the last five years.

I trust you have received all the information you need to make the decision that is in the best interest of our constituents and that very soon we can expect to see a solution to the water supply deficits we are facing now. I want to underscore the urgency that a decision be made without delay.

Sincerely,

A handwritten signature in black ink, appearing to read "R. J. Palmer II".

R. J. Palmer II
State Senator
