This letter is asking for full
intervention of case NO. 2007-00269

(The Peashticks Facility) is a location
very near my home and several of
my neighbors. It is a rural area.

I have concerns over having this
cell phone tower this close to my
home. There are other areas on
the Staton Farm more suitable
and would not be close to any
families.

Would it depreciate my home value?

Would blinking lights bother me?

Would the tower attract more lightning?

Would it be an eye-sore to look at daily?

What about power surges?

Would it interfere with electricity - satellite or phone?

Would it affect me or my family's health?

In my opinion it is not necessary
to locate the tower in such close
proximity to families' homes.

I am 54 years old. This is
where I was brought up. It is
also where my children are
reared. It is to be passed down
to generations to come. I don't
want to pass down the legacy
of suffering the ill affects
that the tower might bring. Can
you prove beyond a doubt none
of my descendants will suffer the
consequences of your proposal?
