

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

RECEIVED

MAR 28 2008

PUBLIC SERVICE
COMMISSION

In the Matter of:

AN EXAMINATION OF THE)
APPLICATION OF THE FUEL)
ADJUSTMENT CLAUSE OF AMERICAN)
ELECTRIC POWER COMPANY FROM)
NOVEMBER 1, 2006 TO APRIL, 2007)

CASE NO. 2007-00276

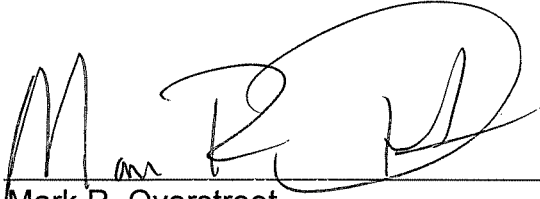

* * * * *

Notice of Filing

Pursuant to Staff's Request at the March 18, 2008 hearing in P.S.C. Case No. 2007-00522, Kentucky Power Company files a copy of the Direct Testimony and Exhibits filed by Appalachian Power Company and Wheeling Power Company with the Public Service Commission of West Virginia in the proceeding involving those companies' Expanded Net Energy Cost for the twelve months ending December 31, 2007.

This 28th day of March, 2008.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Mark R. Overstreet', is written above a horizontal line.

Mark R. Overstreet

A handwritten signature in black ink, appearing to read "Mark R. Overstreet", written over a horizontal line.

Mark R. Overstreet

**BEFORE THE
PUBLIC SERVICE COMMISSION OF WEST VIRGINIA
CASE NO. 08-____-E-GI**

RECEIVED

MAR 28 2008

PUBLIC SERVICE
COMMISSION

**IN THE MATTER OF
APPALACHIAN POWER COMPANY
WHEELING POWER COMPANY**

**EXPANDED NET ENERGY COST
FOR THE
TWELVE MONTHS ENDING DECEMBER 31, 2007**

DIRECT TESTIMONY AND EXHIBITS

FEBRUARY 29, 2008

**APPALACHIAN POWER COMPANY
WHEELING POWER COMPANY
TESTIMONY
OF
TERRY R. EADS**

**DIRECT TESTINOMY OF
TERRY R. EADS
ON BEHALF OF APPALACHIAN POWER COMPANY AND
WHEELING POWER COMPANY
BEFORE THE PUBLIC SERVICE COMMISSION
OF WEST VIRGINIA IN CASE NO. 08-____E-GI**

1 **Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS AND POSITION.**

2 **A.** My name is Terry R. Eads. My business address is Suite 1100, Chase Tower, 707
3 Virginia Street, East, Charleston, West Virginia. I am employed by Appalachian
4 Power Company (APCo) as Director - Regulatory Services for West Virginia.

5 **Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND
6 UTILITY EXPERIENCE.**

7 **A.** I graduated with a Bachelor of Science Degree - Electrical Engineering from West
8 Virginia Institute of Technology in September 1970. In 1984, I attended the American
9 Electric Power Management Development Program at the College of Administrative
10 Science of The Ohio State University. I also attended "The Executive Program" at the
11 University of Virginia's Colgate Darden Graduate School of Business Administration
12 in 1987.

13 After graduation from college, I was employed by APCo as an Electrical
14 Engineer in its Beckley Division. In July 1975, I transferred to Michigan Power
15 Company (MPCo), a former operating company subsidiary of American Electric
16 Power Company, Inc. (AEP), as Engineering Supervisor in the Transmission and
17 Distribution Department; in November 1979, I became Electric Customer Services
18 Supervisor.

19 In September 1981, I assumed the responsibilities of Director of Rates and
20 Tariffs for MPCo. In that capacity I was responsible for the supervision and direction
21 of MPCo's Rate Department relative to rate matters of MPCo's gas and electric
22 operations. Subsequently, I was assigned the further responsibility for MPCo's gas

1 supply and gas transportation functions. In October 1987, following the sale by MPCo
2 of its gas operation, I transferred to Indiana and Michigan Power Company (I&M),
3 another operating company subsidiary of AEP, as Administrative Assistant to the Vice
4 President. My duties included the continued responsibilities for the rate matters of
5 MPCo, as well as other assigned responsibilities for I&M.

6 In September 1990, I transferred back to APCo where I assumed the position of
7 Director of Rates. On January 1, 1996, following a reorganization with a focus toward
8 individual State responsibilities, I assumed my present position in West Virginia.

9 **Q. PLEASE BRIEFLY DESCRIBE YOUR DUTIES AND RESPONSIBILITIES AS**
10 **DIRECTOR-REGULATORY SERVICES FOR WEST VIRGINIA.**

11 **A.** My duties include the supervision and direction of the Regulatory Services
12 Department, which has the responsibility for rate and regulatory matters affecting
13 APCo's West Virginia jurisdiction and Wheeling Power Company (WPCo). Both
14 APCo and WPCo are operating subsidiaries of AEP.

15 **Q. FOR WHOM ARE YOU TESTIFYING IN THIS PROCEEDING?**

16 **A.** I am testifying on behalf of both APCo and WPCo. Hereinafter I will refer to these
17 entities either individually as APCo or WPCo, or jointly as the "Companies".

18 **Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY AS A WITNESS**
19 **BEFORE ANY REGULATORY COMMISSION?**

20 **A.** Yes. In addition to previous testimonies before the Public Service Commission of
21 West Virginia (the Commission) on behalf of APCo and WPCo, I have testified on
22 behalf of APCo before the Virginia State Corporation Commission and the Federal
23 Energy Regulatory Commission (FERC). I have also provided testimony before the

1 Michigan Public Service Commission and the FERC on behalf of other operating
2 company subsidiaries of AEP.

3 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?**

4 **A.** The purpose of my testimony is to provide a general overview of the Companies'
5 request in this proceeding to increase its rates and charges. I will also provide specific
6 support for both the revised Construction Surcharges and revised ENEC Over-
7 Recovery Amortization rate credits related to the Bank, to become effective for service
8 rendered on and after July 1, 2008. I also am supporting a request for a minor
9 modification to the temporary and limited exemption the Commission granted the
10 Companies in Case No- 07-0248-E-GI with regard to the filing for certain approvals
11 pursuant to WV Code 24-2-12.

12 **Q. ARE YOU SPONSORING ANY EXHIBITS?**

13 **A.** Yes, I am sponsoring TRE Exhibit Nos. 2 through 8.

14 **Q. PLEASE PROVIDE A GENERAL OVERVIEW OF THE COMPANIES'**
15 **FILING.**

16 **A.** On July 26, 2006, the Commission issued an Order approving a Joint Stipulation and
17 Agreement for Settlement in Case No. 05-1278-E-PC-PW-42T (the "2005 Base
18 Case"). Among other things, that Order provided for the implementation of Expanded
19 Net Energy Cost (ENEC) rate components, Construction Surcharges and ENEC Over-
20 recovery Amortization Credits in the Companies' tariff rates and charges effective on
21 and after July 28, 2006. Moreover, the Order provided that the Company would file
22 for any adjustments in these various rate components by March 1st of each year
23 thereafter, with the modified rates to become effective on and after July 1st. In

1 accordance with the provisions of the Order, the Companies are herewith filing the
 2 ENEC rate components, Construction Surcharges and ENEC Over-recovery
 3 Amortization Credits they propose to become effective for service rendered on and
 4 after July 1, 2008.

5 **Q. PLEASE DISCUSS THE CHANGES IN ANNUAL REVENUE SUPPORTED IN**
 6 **THE COMPANIES' FILING.**

7 A. The Companies are requesting changes in their approved rates and charges that will
 8 produce a net increase in annual revenue of approximately \$156 million. The
 9 following table identifies the specific components of the overall revenue increase
 10 being requested:

<u>Description</u>	<u>Amount</u>	<u>Percentage Revenue Increase</u> ¹
ENEAC	\$ 134,782,101	
ENEAC Prior-period /Under-recovery	\$ <u>454,205</u>	
Net ENEAC	\$ 135,236,306	14.5 %
Construction Surcharge	\$ 17,234,346	1.8 %
Musser Acquisition Charge	\$ (998,494)	(0.1) %
Reliability Expenditures	\$ <u>4,782,000</u>	<u>0.5 %</u>
Increase in Revenue	\$ 156,254,158	16.7 %

11
 12
 13
 14
 15
 16
 17
 18
 19
 20
 21
 22
 23
 24
 25
 26
 27 As the table indicates, the Companies are requesting an increase in ENEC
 28 revenues of \$135,236,306, an increase for Reliability Expenditures of \$4,782,000, and
 29 a decrease in revenues related to the recent acquisition of the former Musser
 30 Companies located in McDowell County, WV. Support for these requested increases
 31 is provided through the testimony of Company witnesses Rusk, Allen and Ferguson. I

¹ Percentages based on current annual West Virginia retail revenues totaling approximately \$934,000,000.

1 am sponsoring the revenue increase of \$17,234,346 related to the Construction
2 Surcharge.

3 The Companies are also proposing changes in the current ENEC Over-
4 Recovery Amortization Credits applicable to the various customer classes / special
5 contracts. These bill credits have been providing customers with refunds of an over-
6 recovery of ENEC costs that was accrued by APCo at the end of 2000. As will be
7 discussed later in my testimony, the revised credit rate factors will increase the level of
8 future credits for some customers, decrease the credit for others, or eliminate the credit
9 completely in certain circumstances.

10 **Q. PLEASE PROVIDE A GENERAL OVERVIEW OF THE CHANGES IN THE**
11 **COMPANIES' ENEC COSTS THAT RESULT IN THE NEED FOR AN**
12 **INCREASE OF \$135 MILLION IN ENEC REVENUES.**

13 **A.** The ENEC is comprised of costs that tend to be volatile and for which the Companies
14 have a limited ability to control their effects on the cost of providing electric service.
15 These include the cost of fuel consumed at power plants owned by APCo, expenses
16 associated with power and energy purchased by both APCo and WPCo to meet their
17 customer's growing energy needs, the costs to transmit power across the regional
18 transmission grid and variable environmental-related costs.

19 Of the approximate \$135 million requested increase in the Companies' ENEC
20 revenues, roughly \$85 million, or 63% of the increase, can be attributed to fuel-related
21 expenses that include the costs of coal, energy losses on the transmission system and
22 allowances for NOx and SO₂ emissions. With respect to increases for fuel, more than
23 95% of the energy generated at APCo's generating plants is produced from coal. As

1 discussed in the testimony of Company witness Rusk, environmental constraints, a
2 shortage of trained mining personnel and difficulties in obtaining required mining
3 permits applicable to both current and proposed mining operations, combined with
4 high demand in both domestic and export markets for the types of coal required for
5 APCo's generating plants, is causing dramatic increases in market price for coal.

6 The fuel-related costs of transmission losses and emission allowance costs
7 have also increased. The increased cost of transmission losses follows approval by the
8 Federal Energy Regulatory Commission of a revised methodology for pricing losses on
9 the PJM System. Increased emission allowance costs are primarily the result of
10 environmental requirements that now require year-round operation of the SCR's at the
11 Amos and Mountaineer plants to reduce NOx emissions.

12 Of the remaining \$50 million increase, approximately \$29 million relates to
13 purchases of additional power supplies by APCo in order to satisfy a growing demand
14 for power and energy by the Companies' customers. As an example of this growth, in
15 February 2007, the service territory served by APCo experienced an all-time peak
16 demand for electric energy of approximately 8,100 megawatts, or about 1,000
17 megawatts more than the peak previously set by the Company's customers in 2004.
18 Although lower than the previous year, in January of this 2008, the Company
19 experienced a peak demand of approximately 7,850 megawatts. Since these demand
20 levels are greater than the combined capacity of APCo's own sources of generation,
21 the Company must purchase additional energy supplies to serve its customers. An
22 additional \$21 million of projected increased purchased power expense relates to the
23 energy requirements of customers in the service territory supplied by WPCo. As

1 discussed in the testimony of Company witness Allen, this increase can be attributed in
2 great measure to increases in environmental-related investments at, and the cost of fuel
3 for, the generating facilities owned by WPCo's wholesale power supplier, Ohio Power
4 Company.

5 **Q. PLEASE DISCUSS THE \$17.2 MILLION INCREASE IN THE**
6 **CONSTRUCTION SURCHARGE.**

7 **A.** The Commission's order in the 2005 Base Case provided for adjustments in
8 subsequent ENEC proceedings to recover the costs of the Wyoming-Jacksons Ferry
9 765 kV line and the individual flue-gas desulfurization units ("FGD") being installed
10 at the Mountaineer Generating Plant and on Units 1, 2 and 3 at the John Amos
11 Generating Plant. In general, each project would be afforded rate of return treatment
12 on the year-end EPIS/CWIP plant balance, at a 10.5% rate of return on common
13 equity. If a given project has been placed in service by no later than March 1st of the
14 year the ENEC factors become effective, then in addition to the return on the year end
15 balances, APCo would be permitted to recover its projected depreciation, taxes and
16 other fixed operating expenses over the next succeeding ENEC recovery period.

17 **Q. WHICH PROJECTS ARE PRESENTLY IN SERVICE?**

18 **A.** The Wyoming-Jacksons Ferry 765 kV line went into service on June 20, 2006 and the
19 Mountaineer FGD was placed in service on February 20, 2007.

20 **Q. PLEASE DESCRIBE THE DEVELOPMENT OF THE REVENUE**
21 **REQUIREMENTS ASSOCIATED WITH THESE PROJECTS.**

22 **A.** The Companies prepared what could be characterized as stand-alone cost-of-service
23 studies for each of the assets. Pages 2 and 3 of TRE Exhibit No. 2 provide the

1 individual revenue requirement calculations on a West Virginia retail jurisdictional
2 basis for the 765 kV line and the Mountaineer FGD, respectively. Page 4 of TRE
3 Exhibit No. 2 sets forth the revenue requirement on a West Virginia retail
4 jurisdictional basis for FGD facilities on Units 1, 2 and 3 at the John Amos plant, all of
5 which are still under construction.

6 The starting point for computing the revenue requirement for each facility was
7 to determine the rate base equivalent of each project as of December 31, 2007. This
8 involved a review of each project's level of year-end investment, and deducting
9 accumulated depreciation and deferred taxes for projects in service or, for projects not
10 in service, deducting the amount of AFUDC reversed as a result of the cash return
11 allowance provided pursuant to the final Order in the 2005 Base Case. An overall rate
12 of return, grossed up for income taxes, was then applied to arrive at the revenue
13 requirement attributable to the rate base. Thereafter, additional expense items related
14 to depreciation, fixed O&M expense and taxes were added for those facilities that are
15 in service to arrive at the revenue requirement.

16 **Q. WHAT DEPRECIATION RATES WERE USED TO CALCULATE ANNUAL**
17 **DEPRECIATION EXPENSE?**

18 **A.** The Companies utilized the current West Virginia depreciation rates for transmission
19 facilities and the Mountaineer plant.

20 **Q. PLEASE DISCUSS THE FIXED O&M COMPONENT.**

21 **A.** The fixed O&M component for the Mountaineer FGD was based on the forecast of
22 such costs for the twelve-months ending June 30, 2009, the period for which the
23 ENEC rates will be in effect. Company witness Allen provided this cost information

1 to me. The fixed O&M component for the transmission line was based on projections
2 of direct O&M charges for the same twelve-month period.

3 **Q. WHAT RATE OF RETURN WAS APPLIED TO EACH FACILITY IN ORDER**
4 **TO DETERMINE THE REVENUE REQUIREMENT?**

5 **A.** Consistent with the terms of the Order in the 2005 Base Case, the rate of return applied
6 to each facility was based on the thirteen-month average capital structure as of
7 December 31, 2007, including a 10.5% rate of return on common equity. After
8 adjustment for taxes, this results in an overall after-tax rate of return of 7.651%.

9 **Q. PLEASE DISCUSS THE WEST VIRGINIA REVITALIZATION TAX CREDIT**
10 **ENTRY.**

11 **A.** West Virginia provides a tax credit for new production investments after they have
12 been placed into service, equal to 10% of the capitalized investment. This credit is
13 allowed as an offset against APCo's Business and Occupation (B&O) tax over a 10-
14 year period. Accordingly, an annual tax credit has been reflected as a reduction in the
15 revenue requirement attributable to the Mountaineer FGD.

16 **Q. PLEASE DISCUSS THE REDUCTION IN WEST VIRGINIA B&O TAX THAT**
17 **HAS BEEN INCORPORATED INTO THE REVENUE REQUIREMENT FOR**
18 **THE MOUNTAINEER PLANT.**

19 **A.** The current West Virginia B&O tax provides two distinct capacity tax rates applicable
20 to generating capacity installed in West Virginia. For non-scrubbed units, the tax rate
21 is \$22.78 per kW of taxable capacity; and for scrubbed units, the rate is \$20.70 per
22 kW. A total reduction of \$1,530,437 in APCo's annual B&O tax expense has been
23 reflected in the calculation of the Mountaineer FGD revenue requirement.

1 **Q. PLEASE SUMMARIZE THE REVENUE REQUIREMENT ASSOCIATED**
 2 **WITH ALL THE CONSTRUCTION INVESTMENTS AS OF DECEMBER 31,**
 3 **2007.**

4 **A.** As shown on Page 1 of TRE Exhibit No. 2, based on investments as of December 31,
 5 2007, the following are the West Virginia jurisdictional revenue requirements
 6 associated with each of the projects, as well as the total revenue requirement to be
 7 collected by means of the Construction Surcharge, beginning on July 1, 2008.

	Total West Virginia <u>Revenue Requirement</u>
11 Wyoming Jacksons Ferry 765 kV Line	\$15,953,286
12 Mountaineer FGD	\$33,559,422
13 John Amos Unit #3 FGD	\$ 5,664,644
14 John Amos Units #1 and #2 FGDs	<u>\$16,881,942</u>
15 Total	\$72,059,294

16
 17 **Q. PLEASE IDENTIFY TRE EXHIBIT NO. 3 AND TRE EXHIBIT NO. 4.**

18 **A.** TRE Exhibit No. 3 sets forth the Companies' proposed Construction Surcharges
 19 applicable to the Companies' tariffs and/or special contracts effective on and after July
 20 1, 2008.

21 TRE Exhibit No. 4 is a billing analysis that shows the incremental increase in
 22 annual revenue to the Companies of \$17,234,346 from the Construction Surcharges.
 23 The annual increase is the difference between the revenue requirement of \$72,059,294
 24 to be collected over the twelve months ended June 30, 2009 using the proposed
 25 Construction Surcharge rate factors and \$54,824,947 calculated on the basis of the
 26 current Construction Surcharge rates.

27 **Q. HOW WERE THE PROPOSED CONSTRUCTION SURCHARGES ON TRE**

1 **EXHIBIT NO. 3 DEVELOPED?**

2 **A.** The proposed surcharges were developed by allocating the total West Virginia
3 jurisdictional revenue requirement of \$72,059,294 to the individual customer
4 classes/special contracts. Because the revenue requirement is associated with
5 transmission and generation facilities whose costs do not vary with the level of
6 generation, the Companies allocated each year's requirement to the customer classes
7 and special contract customers based on their coincident peak demand relationships.
8 Moreover, because the revenue requirements are for future periods beginning in July
9 2008 and will be applicable to both APCo and WPCo customers, the Companies
10 utilized the forecast coincident peak demand relationships used by Company witness
11 Ferguson to allocate demand-related ENEC.

12 **Q.** **WHAT COST RECOVERY BASIS WAS SELECTED FOR USE IN**
13 **DEVELOPING SURCHARGES FOR THE VARIOUS CUSTOMER CLASSES?**

14 **A.** In the Companies' tariffs that include a demand charge component, the rate factors
15 were developed as a demand surcharge. For those tariffs that bill on an energy-only
16 basis, such as the residential class, the class demand responsibility was reflected as a
17 kilowatt-hour charge using forecast demand/energy relationships. In the case of
18 special contract customers, the basis of the surcharge varied depending on the specifics
19 of each contract's cost recovery mechanism.

20 **Q.** **WHAT BILLING DETERMINANTS WERE USED TO CALCULATE THE**
21 **SURCHARGE FACTORS?**

22 **A.** The surcharges were calculated using the forecast demand and energy billing
23 determinants reflected in the development of the proposed ENEC rate factors to

1 become effective July 1, 2008.

2 **Q. PLEASE DISCUSS THE TREATMENT OF THE ENEC OVER-RECOVERY**
3 **BALANCE (THE “BANK”).**

4 **A.** The Commission’s Order in the 2005 Base Case provided that the Companies would
5 implement rate credits designed to feed back one-third of the balance in the Bank, or
6 approximately \$17,069,000, over the eleven months ending June 30, 2007. Thereafter,
7 treatment of any residual balance and interest was to be determined in subsequent
8 ENEC proceedings. In Case No. 07-0248-E-GI (the “2007 ENEC Case”) the
9 Commission approved a settlement agreement providing that the credit rate factors
10 previously approved in the 2005 Base Case would remain in effect for a second annual
11 period ending June 30, 2008. In the instant ENEC proceeding, the Company must
12 address the treatment of the residual balance of the Bank, plus accumulated interest.

13 **Q. WHAT IS THE COMPANIES’ PROPOSAL FOR THE TREATMENT OF THE**
14 **RESIDUAL BALANCES OF THE BANK AND THE RELATED INTEREST?**

15 **A.** In this proceeding, the Companies are proposing to refund the balance of the Bank and
16 related interest that the Company estimates will exist on June 30, 2008. Based on
17 actual balances of principal and interest as of January 31, 2008 and estimated refunds
18 thereafter through June 30, 2008, the Company estimates that the funds available for
19 refund will total approximately \$18,060,000. This is comprised of approximately
20 \$13,320,000 of residual Bank principal and \$4,740,000 of interest.

21 **Q. HAVE YOU CALCULATED REVISED ENEC OVER-RECOVERY**
22 **AMORTIZATION RATE FACTORS DESIGNED TO REFUND THIS**
23 **BALANCE TO CUSTOMERS?**

1 A. Yes. TRE Exhibit No. 5 sets forth the proposed rate factors to be applied beginning
2 July 1, 2008 and continuing through June 30, 2009.

3 **Q. WILL ALL TARIFF CLASSES AND SPECIAL CONTRACT CUSTOMERS**
4 **THAT PREVIOUSLY RECEIVED BILL CREDITS BE ENTITLED TO THE**
5 **ADDITIONAL REFUND?**

6 A. No. Based on actual refunds through January 2008 and estimated refunds through
7 June 30, 2008, a few customer classes will have received greater bill credits than they
8 were approved to receive under the Commission's Order in the 2005 Base Case.
9 These customer classes, and the amount of excess refund credits, include the
10 Company's School Service Schedule - primary voltage service (\$14,100), the General
11 Service Time of Day Schedule - primary voltage service (\$1,902) and the Large
12 General Service Schedule - subtransmission voltage service (\$47,363). In addition,
13 two of the Company's special contract customers who requested an early distribution
14 of their full share of the Bank and interest will not receive any additional refund
15 credits.

16 **Q. WHAT IS THE COMPANIES' PROPOSAL REGARDING BOTH THE**
17 **COLLECTION OF THESE SPECIFIC OVER-REFUNDED AMOUNTS AND**
18 **ANY POTENTIAL FUTURE OVER OR UNDER COLLECTION OF THE**
19 **BANK AND INTEREST?**

20 A. The Companies propose that when the ENEC Over-Recovery Amortization credit rate
21 factors terminate on June 30, 2009, any residual balances as of that date payable to the
22 customers or any amounts owed to the Companies, be treated as additional ENEC
23 deferred over or under-recovery balances.

1 **Q. PLEASE DISCUSS TRE EXHIBIT NO. 6.**

2 **A.** TRE Exhibit No. 6 details the estimated level of annual credits each customer
3 class/special contract is currently receiving, the amount of annual credit they will
4 receive beginning July 1, 2008, and the resulting change in annual revenue. This
5 exhibit also shows that the level of total annual credits to eligible customers beginning
6 July 1, 2008 is approximately \$1.7 million less what the current factors would produce
7 during the same period. Although the amount of overall credit will be less, as the
8 exhibit shows, some customer groups will experience a larger credit than in the past,
9 and others will receive a smaller credit. Special contract customers who were not
10 originally provided a refund allocation, or those who have already received a full
11 refund have been excluded from the analysis.

12 **Q. PLEASE DESCRIBE TRE EXHIBIT NOS. 7 AND 8.**

13 **A.** TRE Exhibit No. 7 contains the Second Revised Sheet No. 27 of the Companies'
14 P.S.C. West Virginia Tariff No. 12 (Appalachian Power Company) and P.S.C. West
15 Virginia Tariff No. 17 (Wheeling Power Company), which reflects the revised
16 Construction Surcharges to become effective for service rendered on and after July 1,
17 2008. TRE Exhibit No. 8 contains the First Revised Sheet No. 28 of the Companies'
18 P.S.C. West Virginia Tariff No. 12 (Appalachian Power Company) and P.S.C. West
19 Virginia Tariff No. 17 (Wheeling Power Company), which reflects the revised ENEC
20 Over-Recovery Amortization Credits to become effective for service rendered on and
21 after July 1, 2008.

22 **Q: ARE THE COMPANIES PROPOSING ANY CHANGE IN THE TEMPORARY**
23 **AND LIMITED EXEMPTION GRANTED IN CASE NO. 07-0248-E-GI?**

1 A. Yes. They are requesting one slight modification. In the 2007 ENEC proceeding, the
2 parties proposed and the Commission adopted a two-year duration for the exemption.
3 It was contemplated that the Commission would have the benefit of two reports and, in
4 the 2009 ENEC proceeding, to quote the Commission's June 1, 2007 Order in the
5 2007 ENEC proceeding, "the Commission could evaluate how the exemption has
6 operated and whether the partial exemption should be further extended." However, the
7 June 22, 2007 Order granting the two-year exemption evidently accorded it a
8 retroactive starting date, as it provided that the exemption "will automatically end with
9 the Companies' filing of the 2009 ENEC" (emphasis added). The result of this timing
10 will be that it will be impossible for the exemption to be "extended" by the
11 Commission's final ENEC Order in 2009, as it will have already terminated by March
12 1, 2009, at the latest, with the ENEC filing. The Companies are proposing therefore,
13 that in this 2008 ENEC case the Commission extend the partial and limited exemption
14 through July 1, 2009, or at least the entry date of the Commission's final Order in the
15 2009 case. This will prevent APCo and the Companies' ratepayers from being
16 automatically deprived of the benefit of this valuable flexibility during the
17 approximate four-month duration of the 2009 ENEC proceeding. The Commission
18 can then determine in the 2009 case whether it wishes to extend, modify, or terminate
19 the exemption.

20 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

21 A. Yes.

TRE Exhibit No. 7
Proposed Tariff Schedules

Appalachian Power Company / Wheeling Power Company

**APPALACHIAN POWER COMPANY
WHEELING POWER COMPANY
TESTIMONY
OF
WILLIAM A. ALLEN**

**DIRECT TESTIMONY OF
WILLIAM A. ALLEN
ON BEHALF OF APPALACHIAN POWER COMPANY AND
WHEELING POWER COMPANY
BEFORE THE PUBLIC SERVICE COMMISSION
OF WEST VIRGINIA IN CASE NO. 08-_____E-GI**

1 **Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS AND POSITION.**

2 A. My name is William A. Allen, and my business address is 1 Riverside Plaza,
3 Columbus, Ohio 43215. I am employed by American Electric Power Service
4 Corporation (AEPSC), as Director of Operating Company Forecasts. AEPSC supplies
5 engineering, financing, accounting and similar planning and advisory services to the
6 subsidiaries of American Electric Power Company, Inc. (AEP), of which Appalachian
7 Power Company (APCo) and Wheeling Power Company (WPCo) are operating
8 subsidiaries. Hereinafter I will refer to these companies either individually as APCo
9 or WPCo or jointly as "the Companies".

10 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATIONAL BACKGROUND
11 AND BUSINESS EXPERIENCE.**

12 A. I received a Bachelor of Science in Nuclear Engineering from the University of
13 Cincinnati in 1996, and a Master of Business Administration from The Ohio State
14 University in 2004.

15 I was employed by AEPSC beginning in 1992 as a Coop Engineer in the Nuclear
16 Fuels, Safety and Analysis department and upon completing my degree in 1996 was
17 hired on a permanent basis in the Nuclear Fuel section of the same department. In
18 January 1997, the Nuclear Fuel section became a part of Indiana Michigan Power
19 Company (I&M) due to a corporate restructuring. In 1999, I transferred to the

1 Business Planning section of the Nuclear Generation Group as a Financial Analyst. In
2 2000, I transferred back to AEPSC into the Regulatory Pricing and Analysis section as
3 a Regulatory Consultant. In 2003, I transferred into the Corporate Financial
4 Forecasting department as a Senior Financial Analyst. I was named to my current
5 position in April 2007.

6 **Q. WHAT ARE YOUR DUTIES AND RESPONSIBILITIES AS DIRECTOR OF**
7 **OPERATING COMPANY FORECASTS?**

8 A. I am primarily responsible for the supervision of the financial forecasting and analysis
9 of the AEP System's eleven utilities. In such capacity, I coordinate short- and long-
10 term forecasts for these companies as well as monthly analysis of budget to actual
11 variances. With respect to this filing, I am responsible for the derivation of the
12 sources and disposition of energy analysis for the forecast period.

13 **Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN ANY OTHER**
14 **REGULATORY PROCEEDINGS?**

15 A. Yes. I have submitted testimony before the Indiana Utility Regulatory Commission
16 (IURC) in I&M's Fuel Adjustment Clause Cases and before the Michigan Public
17 Service Commission (MPSC) in I&M's Power Supply Cost Recovery Plan Cases.

18 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?**

19 A. The purpose of my testimony is to provide the forecast of the Companies' Expanded
20 Net Energy Cost (ENEC) and Requirement for the twelve-month period ending June
21 30, 2009. In addition, I have provided projected fixed operation and maintenance
22 costs for the Mountaineer FGD system to Company witness Eads. These projections

1 were used to calculate the individual revenue requirements associated with the
2 proposed Construction Surcharges.

3 **Q. WERE THE DATA YOU ARE RELYING ON PREPARED BY YOU OR**
4 **UNDER YOUR SUPERVISION?**

5 A. Yes. They represent the combined efforts of numerous AEP personnel. I have
6 reviewed the data and believe they are based on valid assumptions and reflect, with
7 reasonable forecasting accuracy, the revenues and costs expected in the future.

8 **Q. ARE YOU SPONSORING ANY EXHIBITS TO SUPPORT YOUR**
9 **TESTIMONY IN THIS PROCEEDING?**

10 A. Yes, I am sponsoring the following exhibits:

- 11 ▪ WAA Exhibit No. 2 summarizes the Companies' forecasted ENEC and
12 Requirement for the twelve-month period ending June 30, 2009;
- 13 ▪ WAA Exhibit No. 3 is a sources and uses of energy statement for the twelve-
14 month period ending June 30, 2009; and
- 15 ▪ WAA Exhibit No. 4 details the projected West Virginia jurisdictional sales for
16 the twelve-month period ending June 30, 2009.

17 **Q. PLEASE DESCRIBE THE COMPONENTS OF ENEC PROJECTED IN THIS**
18 **PROCEEDING.**

19 A. WAA Exhibit No. 2 shows the net cost of all sources of energy incurred in supplying
20 the Companies' internal load plus certain other costs and credits, used in the projection
21 of ENEC in this proceeding. WAA Exhibit No. 2, page 1 of 2, provides the ENEC
22 and WAA Exhibit No. 2, page 2 of 2, provides the corresponding energy requirement.
23 The costs include fossil fuel consumed, purchased power from external sources, AEP

1 System Pool transactions, and financial settlement of transmission losses, which are
2 offset by revenues from AEP off-system sales. In addition, the ENEC includes certain
3 other revenues associated with transmission service and emission allowance gains, as
4 well as certain other production costs. These costs are primarily for fuel handling and
5 environmental costs such as consumables and the cost of emission allowances.

6 **Q. WAS THE METHODOLOGY USED TO DEVELOP THE PROJECTED ENEC**
7 **FOR THIS PROCEEDING CONSISTENT WITH THE METHODOLOGY**
8 **USED FOR FORECASTING ENEC IN THE MOST RECENT RATE**
9 **PROCEEDING BEFORE THIS COMMISSION?**

10 A. Yes.

11 Fuel Expense and Fuel Handling (WAA Exhibit No. 2, Page 1, lines 3, 4)

12 **Q. PLEASE DESCRIBE HOW APCO'S PROJECTED COSTS OF FUEL**
13 **CONSUMED AND FUEL HANDLING WERE CALCULATED.**

14 A. The cost of fossil fuel consumed was based on the generation forecast for each of
15 APCo's fossil generating units as projected for the twelve-month period ending June
16 30, 2009 by AEPSC's Resource Planning Section utilizing the simulation model
17 PROMOD. PROMOD utilizes the cost of fuel delivered, as supplied by Company
18 witness Rusk, scheduled maintenance outages and forced outage factors to determine
19 the level of generation required to meet load.

20 The cost of fuel consumed for each of APCo's generating units is equal to the
21 number of tons of coal consumed times the average unit cost of coal in fuel inventory.
22 The average cost of coal is defined by the weighted average cost of coal in inventory
23 at the beginning of the month plus the projected cost of fuel delivered during the

1 month. This calculation is performed for both the cost of coal (account 151 basis) and
2 the cost of fuel handling (account 152 basis).

3 Purchased Power (WAA Exhibit No. 2, page 1, lines 6, 7, 8)

4 **Q. DEFINE THE COSTS THAT ARE REFLECTED UNDER THE HEADING OF**
5 **PURCHASED POWER.**

6 A. Purchased Power for APCo reflects the costs associated with planned purchases and
7 APCo's share of other purchases. In this projection, the planned purchases are for
8 energy purchased from Summersville hydro, OVEC and the Camp Grove and Fowler
9 Ridge wind farms. APCo began receiving energy from the Camp Grove wind farm in
10 January 2008 and expects to begin receiving energy from the Fowler Ridge wind farm
11 in January 2009. The other purchases are market purchases primarily resold to third
12 parties. Through economic dispatch, all purchases are assigned to either internal sales
13 or off-system sales based on costs. The cost of Purchased Power incurred to serve the
14 WPCo retail customers will be discussed later in my testimony.

15 Capacity Settlement (WAA Exhibit No. 2, page 1, line 9)

16 **Q. HOW WERE APCO'S CAPACITY SETTLEMENT CHARGES**
17 **CALCULATED?**

18 A. APCo's capacity settlement charges were calculated as prescribed under the terms of
19 the FERC-approved AEP Interconnection Agreement (Pool Agreement). The Pool
20 Agreement, which is subject to the jurisdiction of the FERC, regulates the inter-
21 company charges and credits for capacity and energy among the AEP operating
22 companies with generating facilities (Pool members). The Pool members are APCo,

1 Columbus Southern Power Company, Ohio Power Company (OPCo), Kentucky
2 Power Company and I&M.

3 In accordance with the Pool Agreement, APCo's projected capacity settlement
4 charges were calculated by multiplying its projected capacity deficit by its projected
5 capacity equalization rate. APCo is a deficit member of the Pool and its deficit
6 position was determined by multiplying its Member Load Ratio (MLR) by the total
7 AEP System capacity, and comparing that result to its own capacity. The equalization
8 rate is composed of a fixed investment rate and a fixed operating rate based on the
9 costs of the surplus companies. To the extent there is more than one surplus company
10 then the deficit companies' equalization rate will be based on the weighted rates of the
11 surplus companies.

12 **Q. THE CAPACITY SETTLEMENT CHARGE, ON A TOTAL COMPANY**
13 **BASIS, IS PROJECTED TO BE \$290.4 MILLION, WHICH IS**
14 **APPROXIMATELY \$35 MILLION HIGHER THAN THE PROJECTED COST**
15 **REFLECTED IN LAST YEAR'S PROCEEDING. PLEASE DESCRIBE THE**
16 **PRIMARY REASONS FOR THIS INCREASE.**

17 **A.** The increase in the capacity settlement charge for the twelve-month period ending
18 June 2009 over the forecast included in the 2007 ENEC can be attributed to several
19 factors. The increase reflects a higher capacity equalization rate primarily due to costs
20 for environmental retrofits placed on certain Ohio Power facilities, partially offset by
21 the effects of additional wind capacity at APCo, and a slightly lower MLR. The effect
22 of the investment including environmental retrofits on certain Ohio Power facilities
23 added approximately \$46 million (total Company basis) to the charge. The addition of

1 wind capacity reduced APCo's capacity settlement charge by approximately \$7
2 million on a total Company basis. The slightly lower MLR reduced the charge by
3 approximately \$4 million (total Company basis).

4 Off-System Sales Received from Pool (WAA Exhibit No. 2, page 1, lines 10, 11)

5 **Q. DEFINE THE COSTS INCLUDED IN OFF-SYSTEM SALES RECEIVED**
6 **FROM THE AEP POOL.**

7 A. In accordance with the Pool Agreement, the cost of off-system sales received from the
8 Pool is APCo's MLR share of the total cost incurred by the AEP System, less its MLR
9 share of the APCo-owned generation assigned to off-system sales. This item is
10 APCo's allocated share of the total system cost incurred to make these sales to third
11 parties.

12 Primary Energy Received (WAA Exhibit No. 2, page 1, line 12)

13 **Q. HOW WAS PRIMARY ENERGY RECEIVED CALCULATED?**

14 A. In accordance with the Pool Agreement, the charges for primary energy received were
15 priced at the average variable cost (fuel + ½ maintenance expense) of the company
16 delivering such energy to APCo.

17 PJM Costs – Excluding Admin (WAA Exhibit No. 2, page 1, lines 13, 14)

18 **Q. DESCRIBE THE COSTS INCLUDED IN PJM COSTS – EXCLUDING**
19 **ADMIN.**

20 A. PJM Costs – Excluding Admin include items such as ancillary charges and credits,
21 operating reserve costs, financial transmission rights (FTR) revenues net of congestion
22 costs for off-system sales, and PJM capacity sales.

1 **Q. PJM COSTS – EXCLUDING ADMIN, ON A TOTAL COMPANY BASIS, ARE**
2 **PROJECTED TO BE \$38.0 MILLION, WHICH IS APPROXIMATELY \$37**
3 **MILLION HIGHER THAN THE PROJECTED COST REFLECTED IN LAST**
4 **YEAR’S PROCEEDING. PLEASE DESCRIBE THE PRIMARY REASON**
5 **FOR THIS INCREASE.**

6 A. The increase in PJM Costs – Excluding Admin for the twelve-month period ending
7 June 2009 over the forecast included in the 2007 ENEC is primarily driven by a \$31
8 million increase in net PJM ancillary charges and credits. Net PJM ancillary charges
9 and credits were not explicitly included in prior forecasts. The net of these charges
10 and credits has become more material and is now included in Company forecasts. The
11 forecasted net PJM ancillary charges and credits of \$31.0 million are consistent with
12 the \$30.6 million incurred during 2007.

13 Transmission Losses (WAA Exhibit No. 2, page 1, line 15)

14 **Q. DESCRIBE THE COSTS INCLUDED IN TRANSMISSION LOSSES.**

15 A. Transmission Losses include costs and credits associated with I²R losses (power losses
16 due to resistance) on the transmission system within PJM. Transmission Losses have
17 always been reflected as a component in developing the projected ENEC. Pursuant to
18 FERC orders in Docket No. EL06-55-000, effective June 1, 2007, PJM began
19 separately billing AEP for transmission losses. APCo is allocated its MLR share of
20 losses associated with both its internal load requirements and its share of off-system
21 sales by AEP. The financial settlement of transmission losses increases the AEP
22 system’s generation available for off-system sales.

23

1 SO₂ and NO_x Expenses (WAA Exhibit No. 2, page 1, line 16)

2 **Q. DESCRIBE THE COSTS INCLUDED IN SO₂ AND NO_x EXPENSES.**

3 A. SO₂ and NO_x Expenses include the costs of consumed emission allowances and
4 consumables used to minimize air emissions. The expenses associated with SO₂ have
5 been estimated pursuant to the methodology established in the FERC-approved AEP
6 Interim Allowance Agreement (IAA). Other expenses for consumables include lime,
7 limestone, urea, polymer and trona.

8 **Q. THE SO₂ AND NO_x EXPENSES, ON A TOTAL COMPANY BASIS, ARE**
9 **PROJECTED TO BE \$40.3 MILLION, WHICH IS APPROXIMATELY \$15**
10 **MILLION HIGHER THAN THE PROJECTED COST REFLECTED IN LAST**
11 **YEAR'S PROCEEDING. PLEASE DESCRIBE THE PRIMARY REASON**
12 **FOR THIS INCREASE.**

13 A. The increase in SO₂ and NO_x expenses for the twelve-month period ending June 2009
14 over the forecast included in the 2007 ENEC is primarily driven by a \$13 million
15 increase in urea expense resulting from increased operation of the Amos 3 and
16 Mountaineer SCRs as well as increased price.

17 Energy Delivered to Pool for Off-System Sales (WAA Exhibit No. 2, page 1, lines 18, 19)

18 **Q. PLEASE EXPLAIN ENERGY DELIVERED TO POOL FOR OFF-SYSTEM**
19 **SALES.**

20 A. The credits associated with the energy delivered to the Pool for off-system sales are
21 the cost of APCo's generation or purchases assigned to those sales less APCo's MLR
22 share of its responsibility for such off-system sales.

23

1 Primary Energy Delivered (WAA Exhibit No. 2, page 1, line 20)

2 **Q. DESCRIBE HOW PRIMARY ENERGY DELIVERED IS CALCULATED.**

3 A. To the extent APCo has energy available for other member companies during an hour,
4 PROMOD would sell that energy to the Pool. APCo would be reimbursed based on
5 its average variable cost of production (fuel + ½ maintenance expense). No such sales
6 are projected for the twelve-month period ending June 30, 2009.

7 CSW Tie Revenue (WAA Exhibit No. 2, page 1, line 21)

8 **Q. PLEASE EXPLAIN CSW TIE REVENUE.**

9 A. To the extent that AEP's east zone has available power to sell to AEP's west zone, the
10 power is sold between zones at market prices. The FERC-approved AEP System
11 Integration Agreement governs these inter-zone transactions. When such transactions
12 occur, the AEP east companies generating for the sale are reimbursed for their costs
13 and receive their MLR share of the margin generated by the sale. The value on this
14 line is APCo's share of the projected amount for sales to the west zone of AEP.

15 Transmission Settlement (WAA Exhibit No.2, page 1, line 22)

16 **Q. EXPLAIN HOW THE TRANSMISSION SETTLEMENT IS CALCULATED.**

17 A. APCo's transmission settlement revenue is calculated in accordance with the FERC-
18 approved AEP Transmission Equalization Agreement (TEA). The TEA regulates the
19 inter-company charges and credits for high-voltage transmission investment among
20 the same AEP operating companies which are parties to the Pool Agreement. In
21 accordance with the TEA, APCo's transmission revenue is calculated by multiplying
22 its transmission investment surplus by its carrying charge rate. APCo is projected to
23 be a surplus member of the transmission pool and its surplus position is determined by

1 multiplying the MLR by the total system investment, and comparing that result to its
2 own investment.

3 Third Party Transmission Revenue (WAA Exhibit No. 2, page 1, line 23)

4 **Q. EXPLAIN HOW THIRD PARTY TRANSMISSION REVENUE IS**
5 **PROJECTED.**

6 A. Third party transmission revenue consists of fees paid to the AEP east companies for
7 use of their transmission lines. The AEP east companies are reimbursed in accordance
8 with the FERC-approved OATT (Open Access Transmission Tariff) and APCo shares
9 in these reimbursements based on its MLR.

10 Off-System Sales Revenue (WAA Exhibit No. 2, page 1, lines 24, 25)

11 **Q. DESCRIBE HOW REVENUES FROM OFF-SYSTEM SALES WERE**
12 **DETERMINED.**

13 A. Revenues from the various components of off-system sales were developed on a
14 System basis with APCo receiving credit for its MLR share of such revenue.
15 Specifically, the revenues were based on the kWh sales levels included in the AEPSC
16 Load Forecast. Revenues related to known off-system sales were developed in
17 accordance with the terms of the specific existing agreements governing those known
18 off-system sales. The remaining sales are assumed sales with unknown parties. The
19 revenues for such sales assume the recovery of costs incurred to make the sale along
20 with a forecast of net realization or margin.

21 FTR Revenue Net of Congestion Costs - LSE (WAA Exhibit No 2, page 1, line 26)

22 **Q. PLEASE EXPLAIN FTR REVENUE NET OF CONGESTION COSTS – LOAD**
23 **SERVING ENTITY (LSE).**

1 A. Within the PJM RTO, members receive FTR revenues and incur congestion costs,
2 which may or may not offset each other. FTRs are financial instruments, which entitle
3 the holder to receive compensation for certain congestion-related transmission charges
4 that arise when the grid is congested. APCo's share of congestion costs is forecasted
5 to exceed its FTR revenues in the twelve-month period ending June 30, 2009 by
6 approximately \$1.3 million on a total Company basis.

7 **Q. THE FTR REVENUE NET OF CONGESTION COSTS FOR THE LSE, ON A**
8 **TOTAL COMPANY BASIS, IS PROJECTED TO BE A NEGATIVE \$1.3**
9 **MILLION, WHICH IS APPROXIMATELY \$26 MILLION HIGHER THAN**
10 **THE PROJECTED COST REFLECTED IN LAST YEAR'S PROCEEDING.**
11 **PLEASE DESCRIBE THE PRIMARY REASON FOR THIS INCREASE.**

12 A. The increase in FTR revenue net of congestion costs for the LSE for the twelve-month
13 period ending June 2009 over the forecast included in the 2007 ENEC is primarily
14 driven by a more precise allocation of FTR revenues between off-system sales and the
15 LSE. This results in more FTR revenues being included in PJM Costs – Excluding
16 Admin than in the previous forecast.

17 Gain/(Loss) on Sale of Allowances (WAA Exhibit No. 2, page 1, line 27)

18 **Q. PLEASE EXPLAIN WHAT IS INCLUDED IN GAIN/(LOSS) ON SALE OF**
19 **ALLOWANCES.**

20 A. Gain/(Loss) on Sale of Allowances includes the proceeds from the sale of withheld
21 allowances in the annual EPA auction, gains associated with the reallocation of
22 allowances related to the Gavin Scrubber and gains associated with market sales of

1 allowances. The provisions of the previously mentioned FERC-approved IAA also
2 govern these allowance transactions.

3 **Q. WHAT ARE THE PROJECTED ENEC AMOUNTS FOR THE TWELVE-**
4 **MONTH PERIOD ENDING JUNE 30, 2009?**

5 A. As shown on WAA Exhibit No. 2, APCo's projected ENEC for the twelve-month
6 period ending June 30, 2009 is \$995.7 million and 41,239 GWh. I have provided this
7 information to Company witness Ferguson for his use.

8 **Q. PLEASE DESCRIBE HOW THE COST TO SERVE THE WPCO LOAD HAS**
9 **BEEN REFLECTED IN THE DERIVATION OF THE ENEC COST**
10 **PROJECTIONS.**

11 A. The wholesale power costs incurred to serve the WPCo load have been included in the
12 derivation of Companies' ENEC as memo items on lines 34 and 35 of WAA Exhibit
13 No. 2, page 1. These amounts reflect the costs expected to be incurred by WPCo to
14 serve its customers based upon new rates developed by OPCo. It is estimated that the
15 new rates would increase WPCo's costs by \$18 million for the twelve-month period
16 ending June 30, 2009. The energy requirement to serve WPCo customers is shown on
17 WAA Exhibit No. 2, page 2.

18 **Q. HAVE YOU PROVIDED COMPANY WITNESS EADS WITH FORECASTED**
19 **DATA ON THE OPERATION OF THE MOUNTAINEER FGD SYSTEM?**

20 A. Yes. The projected fixed O&M cost of \$11.8 million associated with operation of the
21 Mountaineer FGD system for the twelve-month period ending June 30, 2009 was
22 provided to Company witness Eads for his use.

23

1 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

2 A. Yes.

**APPALACHIAN POWER COMPANY
WHEELING POWER COMPANY
TESTIMONY
OF
JASON T. RUSK**

**DIRECT TESTIMONY OF
JASON T. RUSK
ON BEHALF OF APPALACHIAN POWER COMPANY AND
WHEELING POWER COMPANY
BEFORE THE PUBLIC SERVICE COMMISSION
OF WEST VIRGINIA IN CASE NO. 08-_____ E-GI**

1 **Q. PLEASE STATE YOUR NAME, POSITION AND BUSINESS ADDRESS.**

2 A. My name is Jason T. Rusk. I am employed by the American Electric Power Service
3 Corporation ("AEPSC"), a subsidiary of American Electric Power Company, Inc.
4 ("AEP"), in the Fuel, Emissions & Logistics Group as Manager, Eastern Fuel
5 Procurement. My business address is 155 West Nationwide Boulevard, Suite 500,
6 Columbus, Ohio 43215.

7 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATIONAL BACKGROUND.**

8 A. I graduated from Miami University in 1978 with a Bachelor of Science degree in
9 Finance and Economics. I also earned a Master's in Business Administration degree
10 from the University of Cincinnati in 1981 with concentration in Finance and
11 Marketing.

12 **Q. PLEASE DESCRIBE YOUR PROFESSIONAL BACKGROUND.**

13 A. I joined AEP in 1981 as an Internal Auditor and transferred to the coal procurement
14 group in 1983 as an Analyst performing economic studies and drafting language for
15 prospective long-term coal contracts. I transferred into the Logistics Group in 1994 to
16 work on numerous special projects, and returned to the Coal Procurement group in
17 1996.

18 I left AEP in December 2002, and rejoined AEP in my current position in the
19 Fuel, Emissions & Logistics Group as Manager, Eastern Fuel Procurement in June
20 2004.

1 **Q. WHAT ARE YOUR PRINCIPAL AREAS OF RESPONSIBILITY AS**
2 **MANAGER OF FUEL PROCUREMENT FOR AEPSC?**

3 **A.** I am responsible for the procurement of fuel for a portion of AEP's eastern generating
4 fleet, which includes power plants owned and operated by Appalachian Power
5 Company ("APCo"), Indiana Michigan Power Company and Kentucky Power
6 Company. I am an agent for Ohio Valley Electric Corporation and Indiana Kentucky
7 Electric Corporation.

8 **PURPOSE**

9 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?**

10 **A.** The purpose of my testimony in this proceeding is to:

- 11 (1) Describe the coal delivery forecast for the 12 months ending on June 30,
12 2009,
13 (2) Describe APCo's portfolio of coal supply agreements, and
14 (3) Discuss APCo's fuel purchasing strategy.

15 **COAL DELIVERY FORECAST**

16 **Q. HAS AEP PREPARED A FORECAST OF DELIVERED COAL PRICES FOR**
17 **THE APPALACHIAN POWER PLANTS FOR THE PERIOD OF JULY 2008**
18 **THROUGH JUNE 2009?**

19 **A.** Yes. The forecasted data for this period, prepared as of December 2007, was
20 provided for use by Company witness Allen by coal purchase type (Committed, Non-
21 committed and Total) and price per ton (FOB mine, transportation and total delivered
22 price), along with the total weighted average forecasted price of coal delivered to

1 Appalachian's generating stations, on a cents per million BTU basis, for the period
2 July 2008 to June 2009.

3 **Q. IN PREPARING THE FORECAST OF DELIVERED COAL, HAS THE**
4 **COMPANY CHANGED OR AMENDED THE OVERALL PARAMETERS**
5 **THAT IT HAS HISTORICALLY USED IN THE DEVELOPMENT OF COAL**
6 **DELIVERY FORECASTS THAT HAVE BEEN PREVIOUSLY SUBMITTED**
7 **TO THIS COMMISSION?**

8 **A.** No. The methodology utilized in this forecast is consistent with the methodology that
9 has been used by the Company and presented to this Commission in previous
10 proceedings.

11 **APCO'S PORTFOLIO OF COAL SUPPLY AGREEMENTS**

12 **Q. PLEASE DESCRIBE APCO'S PORTFOLIO OF COAL SUPPLY**
13 **AGREEMENTS.**

14 **A.** APCo currently has seven long-term contracts that will be in effect during the twelve-
15 month period ending on June 30, 2009. These contracts have various expiration dates,
16 tonnages, and prices. Summary information regarding these agreements, primarily as
17 it relates to the forecast period, is presented below and in JTR Exhibit No. 2. I will
18 discuss APCo's fuel purchasing strategy relative to all agreements, later in this
19 testimony.

20 1. AMERICAN ENERGY CORPORATION - The American Energy
21 Corporation ("American") contract became effective on December 1, 2006.
22 Barge deliveries under this contract will be made to the Amos and/or

- 1 Mountaineer plants during the forecast period. An escalated price, based on
2 government indices, is used in this agreement.
- 3 2. ARCH COAL SALES COMPANY, INC. – The Arch Coal Sales Company,
4 Inc. (“Arch”) contract began on March 1, 2005. The coal will be delivered by
5 rail to the Amos plant during the forecast period. An escalated price, based on
6 government indices, is used in this agreement.
- 7 3. CENTRAL WEST VIRGINIA ENERGY COMPANY - APCo’s contract with
8 Central West Virginia Energy Company (“CWVE”) began July 1, 1991. The
9 coal will be delivered by rail and/or by barge to the Amos, Mountaineer, Glen
10 Lyn and/or Sporn plants during the forecast period. An escalated price, based
11 on government indices, is used in this agreement.
- 12 4. DYNAMIC ENERGY, INC. – APCo’s contract with Dynamic Energy, Inc.
13 (“Dynamic”) became effective on September 1, 2005. The coal will be
14 delivered by rail to the Glen Lyn plant at a negotiated fixed price during a
15 portion of the forecast period.
- 16 5. GATLING, LLC – The Gatling, LLC (“Gatling”) contract became effective
17 on December 22, 2005. Under this agreement, coal will be delivered by
18 conveyor belt to the Mountaineer plant. Fixed prices per ton have been
19 established for the forecast period.
- 20 6. MASSEY COAL SALES CO., INC. – The first Massey Coal Sales Co., Inc.
21 contract began July 1, 2003. Coal will be delivered to the Amos, Mountaineer
22 and/or Sporn plants by rail and/or by barge under this agreement. A fixed
23 price per ton has been established for the forecast period.

1 7. MASSEY COAL SALES CO., INC. – The second Massey Coal Sales Co.,
2 Inc. contract became effective April 10, 2006. The contract provides for coal
3 to be delivered by barge to the Mountaineer plant. A fixed price per ton has
4 been established for the forecast period

5 **Q. WHY ARE THERE FEWER LONG-TERM COAL SUPPLY AGREEMENTS**
6 **SHOWN ABOVE THAN LISTED IN LAST YEAR’S ENEC FILING?**

7 **A.** Three of the agreements reported in the 2007 ENEC are no longer in effect. The
8 Progress Fuel Corporation and Panther LLC contracts expired on December 31, 2007.
9 Although the COALSALES agreement provided for an extension of the term beyond
10 December 31, 2007, the seller elected not to exercise that option.

11 **Q. ARE THERE OTHER LONG-TERM COAL SUPPLY AGREEMENTS IN**
12 **DEVELOPMENT THAT COULD AFFECT COAL PRICES AND**
13 **DELIVERIES DURING THE FORECAST PERIOD?**

14 **A.** Yes. A number of agreements are currently being finalized that are expected to result
15 in long-term coal deliveries during the forecast period at higher prices than those
16 reflected in the December 2007 forecast used in this proceeding.

17 **Q. IN ADDITION TO ITS LONG-TERM CONTRACTS, DOES APCO HAVE**
18 **ANY OTHER TERM COAL SUPPLY ARRANGEMENTS?**

19 **A.** Yes. APCo has taken advantage of opportunities to extend term purchase orders at
20 favorable pricing. APCo currently has one purchase order with a term greater than
21 one year. Such agreement with Delta Coals & Red River Coal Company was
22 previously extended beyond its original term to include a portion of the forecast
23 period.

FUEL PURCHASING STRATEGY

Q. PLEASE DESCRIBE APCO'S COAL PURCHASING STRATEGY.

A. APCo's purchasing strategy for coal is based on continuous market monitoring and evaluation along with periodic competitive offers. The consumption needs are determined from a system-based approach that predicts said needs on a plant-by-plant basis. Coal supply offers are solicited from active suppliers by specifying the quality and logistical parameters sought for each plant. From the offers received, APCo then makes its selection, if reasonable, of the coals needed to meet its requirements based primarily on price and coal quality considerations.

Q. HAVE THERE BEEN ANY RECENT CHANGES IN COAL MARKET CONDITIONS THAT HAVE SIGNIFICANTLY AFFECTED OR WILL SIGNIFICANTLY AFFECT APCO'S COAL PROCUREMENT PRACTICES?

A. Yes. The coal industry has experienced a number of situations that have impacted current coal deliveries and prices. Some of these events include: reductions in and delays in "new" mine operating permits, high domestic and international demand for the types of coal required for APCo's coal generating plants, a shortage of trained mining personnel and environmental constraints. As a result, higher delivered coal costs are projected for 2008 and 2009.

Q. HAS APCO PARTICIPATED IN ANY RECENT COAL SOLICITATIONS?

A. Yes. The Company has participated in four coal solicitations for high fusion coals of low and high level sulfur since January 2007. In 2007, the first solicitation was on January 19, 2007, the second on April 23, 2007, and the third one on August 6, 2007.

1 The first solicitation indicated that the company is interested in one or more
2 agreements with a minimum of 10,000 tons of coal per month with deliveries by rail
3 or barge commencing as early as January 1, 2008 for a minimum term of one year
4 and up to three years. The second solicitation invited tenders of one or more
5 agreements of 10,000 tons of coal per month with deliveries by rail or barge
6 commencing as early as January 1, 2008 for a term of one year, three years and up to
7 five years. The third solicitation invited tenders of one or more agreements of 25,000
8 tons of coal per month with deliveries by rail or barge commencing as early as
9 January 1, 2008. Additionally, the third solicitation also invited tenders of one or
10 more agreements of a maximum of 1,000,000 tons per year for delivery by rail or
11 barge commencing in 2010.

12 The Company has participated in one solicitation to date in 2008. The
13 solicitation invites tenders for one or more spot agreements, each for the supply of a
14 minimum of 5,000 tons of coal per month, delivered by rail or barge, commencing in
15 April 2008 as available. Additionally, the same solicitation also invites tenders for
16 one or more term agreements, each for the supply of a minimum of 10,000 tons of
17 coal per month, delivered by rail or barge, commencing in 2009.

18 **Q. PLEASE DISCUSS HOW APCO HAS ADAPTED ITS FUEL PURCHASING**
19 **STRATEGY TO ADDRESS CURRENT CIRCUMSTANCES AND MAINTAIN**
20 **FUEL FLEXIBILITY?**

21 **A.** APCo has participated in a limited number of coal hedges that allow the Company to
22 take advantage of attractively priced coal supplies for the benefit of its customers.
23 Furthermore, APCo will mitigate excess fuel supplies as needed in order to maximize

1 operational flexibility. The Company will continue to participate in coal solicitations
2 and invoke its option rights under existing agreements for additional tonnage when it
3 is economically viable.

4 **Q. WHAT IS THE STATUS OF THESE HEDGES ACQUIRED IN 2007?**

5 A. These hedges have been liquidated by the Company over a period of time. Margins
6 from these hedge transactions are being used as a credit against the cost of fuel for
7 APCo's customers in 2008. The hedges served to lock in an attractive price of coal
8 against potential volatility.

9 **Q. HAS APCO MADE USE OF THE TEMPORARY AND LIMITED**
10 **EXEMPTION WHICH THE COMMISSION GRANTED IT IN CASE 07-0248-**
11 **E-GI TO ENGAGE IN CERTAIN SPECIFIED FUEL TRANSACTIONS**
12 **WITHOUT OBTAINING PRIOR APPROVAL UNDER W.VA. CODE §24-2-**
13 **12?**

14 A. Yes. Since the issuance of the Commission's Order on June 22, 2007, there has been
15 no need for APCo to engage in any transactions with affiliates. However, APCo has
16 engaged in a number of coal hedges and a number of exempted purchase-and-sale
17 transactions. These are all detailed in the report on exempted transactions which is
18 being filed separately as an informational filing (under seal, accompanied by a motion
19 for protective treatment) as part of the Companies' 2008 ENEC proceeding. To the
20 extent that the Commission or any party has questions about these transactions, I am
21 prepared to address them, subject to such protective measures as the Commission sees
22 fit to impose. As the detail in the Report demonstrates, the flexibility allowed by the

1 Commission's exemption has been useful and beneficial to APCo and the
2 Companies' ratepayers in pursuing an effective fuel procurement strategy.

3 **Q. PLEASE PROVIDE A SUMMARY OF APCO'S ANTICIPATED SOURCES**
4 **OF NATURAL GAS SUPPLY AND COSTS.**

5 A. APCo's only natural gas fired facility is the Ceredo Power Plant (Ceredo). Ceredo's
6 day-to-day needs for natural gas are generally unpredictable and will be purchased on
7 a day-ahead and intra-day basis as needed for peaking requirements. Natural gas
8 purchases will be competitively bid and primarily obtained in the spot market with
9 prices on a daily index or a daily fixed price. APCo has arranged for interruptible
10 transportation service from various inter-state pipelines, which will provide flexible
11 supplies from multiple production areas. APCo has also arranged for firm
12 transportation with Mountaineer Gas Company, the local distribution company that
13 will move the needed supplies from the inter-state pipeline to the Ceredo facility.

14 **Q. IS RISK ASSESSMENT STILL AN IMPORTANT FACTOR IN COAL**
15 **PURCHASING DECISIONS?**

16 A. Yes. APCo places great importance on a vendor's financial status, ability to deliver,
17 and past performance when evaluating its decision to do business with that supplier.
18 Purchases from reliable vendors serve to enhance APCo's security of supply.

19 **Q. DO YOU HAVE AN OPINION REGARDING THE REASONABLENESS OF**
20 **APCO'S PROJECTED FUEL COSTS?**

21 A. Yes. APCo has and continues to aggressively pursue and manage its fuel supplies
22 and transportation costs to provide reliable supplies at reasonable costs. In my
23 opinion, the projected fuel costs are reasonable.

1 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

2 A. Yes.

**APPALACHIAN POWER COMPANY
WHEELING POWER COMPANY
TESTIMONY
OF
STEVEN H. FERGUSON**

**DIRECT TESTIMONY OF
STEVEN H. FERGUSON
ON BEHALF OF APPALACHIAN POWER COMPANY AND
WHEELING POWER COMPANY
BEFORE THE PUBLIC SERVICE COMMISSION OF
WEST VIRGINIA IN CASE NO. 08-____-E-GI**

1 **Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS AND POSITION.**

2 **A.** My name is Steven H. Ferguson. My business address is 707 Virginia Street,
3 East, Charleston, West Virginia. I am employed by Appalachian Power Company
4 ("APCo") as a Principal Regulatory Consultant – Regulatory Services for West
5 Virginia.

6 **Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND
7 BUSINESS EXPERIENCE.**

8 **A.** I graduated with a Bachelor of Science Degree in Mathematics from Radford
9 College, Radford Virginia, in 1979. In 2007, I attended the American Electric
10 Power Strategic Leadership Program at The Ohio State University's Fisher
11 College of Business.
12 I joined APCo in May of 1979 as an Engineering Technician in the Operations
13 Department in Roanoke Virginia, where I was responsible for statistical reporting
14 of load research data. In 1981, I was promoted to Statistical Analyst in the
15 Allocation Section of the Rate Department. In 1985, I was promoted to an
16 Allocation Analyst where I was responsible for completing the Company's
17 jurisdictional allocation studies and cost of service studies. Following the
18 reorganization of the AEP system in 1996, I moved to Charleston, West Virginia
19 as a Rate Analyst I. In January of 1998, I was promoted to the position of Senior
20 Rate Analyst. In April 2006, I was promoted to my current position.

21 **Q. WHAT ARE YOUR DUTIES AS A PRINCIPAL REGULATORY
22 CONSULTANT?**

1 A. My current duties include performing various rate and regulatory activities for
2 APCo and Wheeling Power Company (“WPCo”) in West Virginia including the
3 preparation of Expanded Net Energy Cost (“ENEC”) filings.

4 **Q. FOR WHOM ARE YOU TESTIFYING IN THIS PROCEEDING?**

5 A. I am testifying on behalf of both APCo and WPCo. I shall refer to these entities
6 individually as APCo or WPCo, or jointly as the “Companies.”

7 **Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY AS A WITNESS**
8 **BEFORE ANY REGULATORY COMMISSION?**

9 A. Yes. I presented testimony on behalf of APCo before the Public Service
10 Commission of West Virginia in Case No. 96-0458-E-GI and Case No. 99-0409-
11 E-GI. I have also presented testimony for APCo and WPCo in Case No. 05-1278-
12 E-PC-PW-42T and Case No. 07-0248-E-GI.

13 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**
14 **PROCEEDING?**

15 A. The purpose of my testimony is to: 1) support the forecast and actual
16 jurisdictional and class demand and energy allocation factors used in the
17 development of the proposed ENEC factors; 2) provide detailed calculations of
18 the ENEC recovery position for the period January 2007 through December 2007;
19 3) support the development of the proposed ENEC rate components to be
20 incorporated into the rates to be approved in this case; and 4) provide P.S.C. W.
21 VA. Tariff No. 12 (Appalachian Power Company) and P.S.C. W. VA. Tariff No.
22 17 (Wheeling Power Company) tariff sheets incorporating the Companies’
23 proposed ENEC rates.

1 In addition to the ENEC, I will address the cost recovery provisions approved in
2 the Commission's April 18, 2007 order in Case No. 06-0828-EW-SC, with
3 respect to APCo's acquisition of assets and assumption of service responsibilities
4 of the electric operations of the four Musser Companies providing service in
5 McDowell County, West Virginia.

6 I will also discuss the treatment of the Companies' reliability expenditures as
7 provided in the Commission's order in Case No. 05-1278-E-PC-PW-42T (2005
8 Base Case).

9 ENEC

10 **Q. FOR WHICH TIME PERIOD HAVE YOU PREPARED FORECAST**
11 **JURISDICTIONAL AND CLASS DEMAND AND ENERGY**
12 **ALLOCATION FACTORS?**

13 **A.** The forecast jurisdictional and class demand and energy allocation factors have
14 been prepared for the twelve-month period ending June 2009.

15 **Q. IS THE METHODOLOGY USED IN DETERMINING THE FORECAST**
16 **JURISDICTIONAL AND CLASS DEMAND AND ENERGY**
17 **ALLOCATION FACTORS THE SAME AS THAT USED IN THE**
18 **COMPANIES' LAST ENEC FILING?**

19 **A.** Yes. The determination of these allocation factors is based upon the demand and
20 energy forecasts provided by the Resource Planning & Operations Analysis
21 Section of the American Electric Power Service Corporation and employs the
22 same methodology utilized by the Companies in Case No. 07-0248-E-GI (2007
23 ENEC Case).

- 1 **Q. PLEASE EXPLAIN THE DEVELOPMENT OF APCO'S**
2 **JURISDICTIONAL DEMAND AND ENERGY ALLOCATION FACTORS.**
- 3 A. The jurisdictional allocation factors for APCo are based on the forecast of demand
4 and energy requirements for the twelve months ending June 30, 2009, as shown in
5 SHF Exhibit No. 2. This forecast projects sales to ultimate and wholesale
6 customer groups in West Virginia, Virginia and Tennessee and an aggregation of
7 system losses. SHF Exhibit No. 3 provides the calculation of the jurisdictional
8 demand and energy factors used to allocate APCo's projected ENEC-related
9 components to the West Virginia jurisdiction.
- 10 **Q. PLEASE DESCRIBE THE DEVELOPMENT OF THE PROJECTED**
11 **CUSTOMER DEMAND AND ENERGY ALLOCATION FACTORS.**
- 12 A. The projected customer demand and energy allocation factors were developed
13 through a process that apportions the forecast West Virginia jurisdictional demand
14 and energy requirements among the customer classes based primarily on actual
15 demand and energy data for a historic twelve-month period, in this case the year
16 ended December 31, 2007. SHF Exhibit No. 4 provides detail of the forecast
17 customer class demand and energy allocation factors.
- 18 **Q. IS THE METHODOLOGY FOR DEVELOPING THE JURISDICTIONAL**
19 **AND CLASS ALLOCATION FACTORS CONSISTENT WITH THE**
20 **PROCEDURES USED IN PREVIOUS ENEC PROCEEDINGS?**
- 21 A. Yes. The same methodology was used in the development of the ENEC rates that
22 were put into effect on July 1, 2007.
- 23 **Q. PLEASE SUMMARIZE THE ACTUAL ENEC RECOVERY POSITION**
24 **FOR THE PERIOD JANUARY 2007 THROUGH DECEMBER 2007.**

1 A. I have prepared SHF Exhibit No. 5 to summarize the ENEC recovery position on
2 an actual basis for the period January 2007 through December 2007. As shown in
3 SHF Exhibit No. 5, APCo has recorded an under-recovery of \$454,205, as related
4 to the Companies' ENEC recovery position.

5 **Q. WHAT IS THE PRIMARY OBJECTIVE IN THE DEVELOPMENT OF**
6 **THE PROPOSED ENEC FACTORS?**

7 A. The primary objective in the development of the ENEC factors is to recover the
8 projected jurisdictional ENEC related costs for the twelve-month period ending
9 June 30, 2009, as allocated to each customer class, net of any prior period under-
10 recovery responsibility among the classes. SHF Exhibit No. 6 provides the
11 forecast class energy and demand ENEC related cost responsibilities including
12 recognition of the prior period under-recovery.

13 **Q. PLEASE GENERALLY DESCRIBE THE METHODOLOGY USED TO**
14 **DEVELOP THE ENEC FACTORS INCLUDED IN THE COMPANIES'**
15 **PROPOSED RATES.**

16 A. The development of the proposed ENEC factors began with a forecast of the
17 annual components of costs and revenues to be included in the ENEC. In this
18 case, the forecast period is the twelve months ending June 30, 2009. To the extent
19 the ENEC components are associated with multiple jurisdictions, as is the case for
20 APCo, they are allocated to West Virginia and then to the customer classes, or
21 individual customers, based on appropriate demand and energy relationships.
22 Once the ENEC components have been assigned to a class of customer, forecast
23 billing determinants for each customer class were used to arrive at the individual
24 demand or energy factors appropriate to recover each class's ENEC.

1 **Q. HAVE THE COSTS AND REVENUES RELATED TO WPCO BEEN**
2 **INCLUDED IN THE ENEC CALCULATION?**

3 **A.** Yes. Consistent with the order in the 2005 Base Case, the ENEC factors were
4 brought into parity for both Companies. Accordingly, forecast annual
5 components of WPCo's costs of purchased power and sales have been reflected in
6 the development of the proposed ENEC factors.

7 **Q. IS THERE ANY PRIOR-PERIOD OVER/UNDER-RECOVERY**
8 **COMPONENT REFLECTED IN THE PROPOSED ENEC FACTORS?**

9 **A.** Yes. As in prior ENEC proceedings, the new ENEC factors include both the "in-
10 period" rate components related to projected future costs, and a "prior period"
11 component. The "prior period" rate component in the proceeding provides for the
12 recovery of actual ENEC balance as of December 31, 2007.

13 **Q. HAVE YOU PREPARED AN EXHIBIT SUMMARIZING THE ENEC**
14 **FACTORS WHICH THE COMPANIES PROPOSE TO BECOME**
15 **EFFECTIVE JULY 1, 2008?**

16 **A.** Yes. SHF Exhibit No. 7 reflects the ENEC rates the Companies propose to be
17 incorporated in the Companies' tariffs to allow for the recovery of both rate
18 components. The ENEC factors shown in SHF Exhibit No. 7 would provide for
19 the recovery of \$140,018,306 in additional revenues and reflects \$135,236,306 in
20 ENEC revenues and \$4,782,000 in reliability expenditures revenues which I will
21 discussed later in my testimony.

22 **Q. PLEASE DESCRIBE HOW THE \$135,236,306 WAS DETERMINED.**

23 **A.** It was determined by comparing the ENEC revenue received using the forecast
24 period billing determinants under the previously approved ENEC factors with

1 revenues that would be received from the proposed factors when applied to the
2 forecast period billing determinants. SHF Exhibit No. 8 calculates the proposed
3 revenues to be used to develop the rates needed to produce the additional
4 \$135,236,306.

5 **Q. HAVE YOU PREPARED REVISED TARIFF SHEETS INCORPORATING**
6 **THE COMPANIES' PROPOSED ENEC FACTORS AS PROVIDED IN**
7 **SHF EXHIBIT NO. 9?**

8 **A.** Yes. SHF Exhibit No. 9 contains proposed revisions of the applicable tariff
9 schedules of the Companies' P.S.C. West Virginia Tariff No. 12 (Appalachian
10 Power Company) and P.S.C. West Virginia Tariff No. 17 (Wheeling Power
11 Company). These revised Tariffs No. 12 and 17 are designed to become effective
12 with service rendered on and after July 1, 2008.

13 **MUSSER COMPANIES SERVICE ACQUISITION**

14 **Q. PLEASE ADDRESS THE COMPANIES' COST RECOVERY POSITION**
15 **AS IT RELATES TO APCO TAKING OVER THE FACILITIES AND**
16 **SERVICE OBLIGATION AS ORDERED IN CASE NO. 06-0828-EW-SC.**

17 **A.** As shown in SHF Exhibit No. 10, APCo's expenditures through December 31,
18 2007 to upgrade and repair the facilities of the former McDowell County Musser
19 Companies were \$1,393,108.33 for O&M expenses, \$83,333.33 for amortization
20 expenses of the purchase price and \$20,267.87 for the return/taxes required on the
21 additional net new investment incurred for upgrades and repairs, for a total of
22 \$1,496,709.53. The revenues collected through the approved surcharge for the
23 same period were \$1,037,950.95.

1 **Q. HAS APCO ESTIMATED THE EXPENDITURES THAT WILL BE**
2 **REQUIRED TO CONTINUE THE UPGRADES AND REPAIRS OF THE**
3 **FORMER MCDOWELL COUNTY MUSSER COMPANIES?**

4 **A.** Yes. SHF Exhibit No. 11, shows the level of O&M expenses and capital
5 expenditures projected over the coming year in order to continue the upgrades and
6 repairs to the former facilities of the McDowell County Musser Companies. As
7 shown on this exhibit, APCo expects to incur O&M expenditures of \$1,006,500
8 and capital expenditures of \$2,080,000.

9 **Q. WHAT IS THE BASIS FOR THE PROPOSED EXPENDITURES**
10 **INCLUDED IN YOUR EXHIBIT?**

11 **A.** APCo personnel have projected these expenditures on the basis of work already
12 performed and the projected work to complete the upgrades and repairs necessary
13 to bring the facilities up to the standards APCo deems appropriate.

14 **Q. HAS APCO BEEN TRACKING THE REVENUE COLLECTED**
15 **THROUGH THE ADDITIONAL RETAIL SALES SURCHARGE TARIFF**
16 **AND THE ACTUAL COST INCURRED PURSUANT TO THE**
17 **COMMISSION'S ORDER?**

18 **A.** Yes. APCo is tracking both the revenues collected and the actual cost incurred
19 with the understanding that any over or under recoveries of the costs currently
20 being deferred will be reconciled in the next base rate case.

21 **Q. HAVE YOU DEVELOPED NEW ESTIMATES OF THE ANNUAL**
22 **REVENUE REQUIREMENTS NEEDED FOR SYSTEM UPGRADES AND**
23 **REPAIRS OF THE FORMER MUSSER COMPANIES TO BE**
24 **RECOVERED IN THE CURRENT ENEC COST RECOVERY PERIOD?**

1 A. Yes. SHF Exhibit No. 12 provides the projected O&M expenses APCo estimates
2 it will incur and expects to recover during the twelve months ending June 30,
3 2009. In addition, this exhibit also provides projections of the estimated capital
4 investment and related required return along with the tax and depreciation
5 expense.

6 Q. **HAVE YOU CALCULATED A PROPOSED SURCHARGE FACTOR TO**
7 **RECOVER THE SYSTEM UPGRADES AND REPAIRS REVENUE**
8 **REQUIREMENT?**

9 A. Yes. As shown on SHF Exhibit No. 13, I have calculated a surcharge rate of
10 \$0.000148 by dividing the revenue requirement for the upgrades and repairs by
11 the projections of ENEC kwh sales for customers served under the RS, SGS, SS,
12 SWS, MGS, OL and SL rate schedules.

13 **RELIABILITY EXPENDITURES**

14 Q. **PLEASE EXPLAIN THE TREATMENT OF THE RELIABILITY**
15 **EXPENDITURES APPROVED IN THE 2005 BASE CASE?**

16 A. The Commission's order approving in the Joint Stipulation reached in the 2005
17 Base Case, provided that should the Companies expend an annual average of
18 \$18,660,000 in calendar years 2007, 2008 and 2009, for measures designed to
19 maintain and enhance reliability of service (i.e. right-of-way vegetation
20 management and asset management activities), and should the Companies fail to
21 earn a rate of return on common equity ("ROE") of at least 10.5% on a per books
22 retail jurisdictional basis in any of those years, then APCo shall be entitled to
23 defer an amount for T&D reliability expenditures sufficient to enable its ROE to
24 equal 10.5%, up to a maximum annual deferral of \$4.782 million.

1 **Q. HOW MUCH DID THE COMPANIES EXPEND FOR RELIABILITY**
2 **RELATED EXPENSES DURING 2007?**

3 **A. As shown on SHF Exhibit No. 14, the Companies reliability related expenditures**
4 **for 2007 were \$19,630,992.**

5 **Q. DID THE COMPANIES ACHIEVE AN ROE OF 10.5% DURING**
6 **CALENDAR YEAR 2007?**

7 **A. No. SHF Exhibit No. 15 shows the Companies on a combined basis achieved an**
8 **ROE of 8.705%.**

9 **Q. HAS APCO RECORDED A REGULATORY ASSET FOR THE \$4.782**
10 **MILLION?**

11 **A. Yes. The APCo determined that it would not achieve an ROE of 10.5% and**
12 **recorded a regulatory asset in December 2007 for the entire \$4.782 million.**

13 **Q. IS APCO SEEKING RECOVERY OF THE \$4.782 MILLION IN THIS**
14 **ENEC PROCEEDING?**

15 **A. Yes. The Commission order provides for APCo, at its election, to obtain recovery**
16 **of any such deferral in succeeding ENEC or base rate case(s) following such**
17 **deferrals.**

18 **Q. HAVE YOU CALCULATED THE CHANGE IN THE COMPANIES ROE**
19 **AFTER THE RECORDING OF THE \$4.782 MILLION REGULATORY**
20 **ASSET?**

21 **A. Yes. The recording of the regulatory asset increased the combined Companies per**
22 **books ROE from 8.705% prior to the deferral to 9.010% after the deferral.**

23 **Q. PLEASE DESCRIBE SHF EXHIBIT NO.16.**

1 A. SHF Exhibit No. 16, shows the right-of-way expenditures as filed in the 2005
2 Base Case and the Companies proposed method of assigning the \$4.782 million
3 recovery to the transmission and distribution services.

4 **Q. HOW DO THE COMPANIES PROPOSE TO ASSIGN CLASS**
5 **RESPONSIBILITY FOR THE RECOVERY OF THE \$4.782 MILLION**
6 **DEFERRAL?**

7 A. The Companies propose to collect the transmission portion of the deferral from all
8 customers. The Companies also propose to recover the distribution portion from
9 all customer classes that are served at primary distribution or lower. This assigns
10 the recovery responsibility to those classes that benefit most from the dollars
11 spent in clearing right-of way.

12 **Q. HAVE YOU INCLUDED THE RECOVERY OF THE \$4.782 MILLION**
13 **DEFERRAL IN THE PROPOSED ENEC RATES YOU ARE**
14 **SUPPORTING AS SHOWN IN SHF EXHIBIT NO. 7?**

15 A. Yes.

16 **Q. DOES THAT CONCLUDE YOUR DIRECT TESTIMONY?**

17 A. Yes, it does.

Proposed Tariff Schedules

P.S.C. W.VA. TARIFF NO. 12 (APPALACHIAN POWER COMPANY)
P.S.C. W.VA. TARIFF NO. 17 (WHEELING POWER COMPANY)

SCHEDULE R.S.
(Residential Service)

AVAILABILITY OF SERVICE

Available for electric service through one meter to individual residential customers, including rural residential customers engaged principally in agricultural pursuits.

MONTHLY RATE (Schedule Codes 011, 015, 018, 038, 039, 051)

	Customer Charge	\$ 4.00/month
	Energy Charge:	
(I)	First 500 KWH	7.288¢/KWH
(I)	All Over 500 KWH	6.070¢/KWH

MINIMUM CHARGE

This Schedule is subject to a minimum monthly charge equal to the Customer Charge.

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

PAYMENT

Bills are due upon receipt and payable by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company within twenty (20) days of the mailing date. Effective October 1, 2006, any amount due and not received by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company by the next scheduled read date shall be subject to a delayed payment charge of 1%. This charge shall not be applicable to local consumer utility taxes.

TERM

Contracts may be required pursuant to the Extension of Service provision of the Company's Terms and Conditions of Service.

SPECIAL TERMS AND CONDITIONS

This Schedule is subject to the Company's Terms and Conditions of Service.

This Schedule is available to rural domestic customers engaged principally in agricultural pursuits where service is taken through one meter for residential purposes, as well as for the usual farm uses outside the home, but service under this Schedule shall not be extended to operations of a commercial nature or operations such as processing, preparing or distributing products not raised or produced on the farm, unless such operation is incidental to the usual residential and farm uses.

(C) Indicates Change, (D) Indicates Decrease, (I) Indicates Increase, (N) Indicates New, (O) Indicates Omission, (T) Indicates Temporary

P.S.C. W.VA. TARIFF NO. 12 (APPALACHIAN POWER COMPANY)
P.S.C. W.VA. TARIFF NO. 17 (WHEELING POWER COMPANY)

SCHEDULE R.S.
(Residential Service)
(continued)

SPECIAL TERMS AND CONDITIONS (Cont'd)

This Schedule is intended for single-phase service. Where the residential customer requests three-phase service, this Schedule will apply if the customer pays to the Company the difference between constructing single-phase and three-phase service. Where motors or heating equipment are used for commercial or industrial purposes, the applicable general service schedule will apply to such service.

The Company shall have the option of reading meters monthly or bi-monthly.

Customers with cogeneration and/or small power production facilities shall take service under Schedule COGEN/SPP or by special agreement with the Company.

S.R.R.-R.S. AMENDMENT

This SRR-RS Amendment shall be applicable to electric service for the billing months of December, January, February, March, and April to residential customers who qualify for special reduced rates under the provision of West Virginia Code §24-2A. The rates and charges for service under this amendment shall be twenty percent (20%) less than the rates and charges for service rendered under this Schedule. The Company shall apply all relevant and applicable requirements and conditions of West Virginia Code §24-2A, and all other requirements of Terms and Conditions of Service of the Company's West Virginia P.S.C. Tariff and this Schedule.

LOAD MANAGEMENT WATER HEATING PROVISION (Schedule Codes 011, 051)

- (I) For residential customers who install a Company-approved load management water-heating system which consumes electrical energy primarily during off-peak hours specified by the Company and stores hot water for use during on-peak hours, of minimum capacity of 80 gallons, the last 250 KWH of use in any month shall be billed at 3.519¢/KWH.

This provision, however, shall in no event apply to the first 200 KWH used in any month, which shall be billed in accordance with the "MONTHLY RATE", as set forth above.

For the purpose of this provision, the on-peak billing period is defined as 7 a.m. to 9 p.m., local time, for all weekdays, Monday through Friday. The off-peak billing period is defined as 9 p.m. to 7 a.m., local time, for all weekdays, all hours of the day on Saturdays and Sundays, and the legally observed holidays of New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

The Company reserves the right to inspect at all reasonable times the load management water heating system(s) and devices which qualify the residence for service under the Load Management Water Heating Provision. If the Company finds that, in its sole judgment, the availability conditions of this provision are being violated, it may discontinue billing the customer under this provision and commence billing under the standard monthly rate.

(C) Indicates Change, (D) Indicates Decrease, (I) Indicates Increase, (N) Indicates New, (O) Indicates Omission, (T) Indicates Temporary

P.S.C. W.VA. TARIFF NO. 12 (APPALACHIAN POWER COMPANY)
P.S.C. W.VA. TARIFF NO. 17 (WHEELING POWER COMPANY)

SCHEDULE R.S.-T.O.D.
(Residential Service Time-of-Day)

AVAILABILITY OF SERVICE

Available for electric service to individual residential customers, including rural residential customers engaged principally in agricultural pursuits who wish to be metered through one single-phase multiple-register meter capable of measuring electrical energy consumption during the on-peak and off-peak billing periods.

MONTHLY RATE (Schedule Codes 030, 032)

Customer Charge\$12.60/month

Energy Charge:

(I) All KWH during the on-peak billing period 10.321¢/KWH
(I) All KWH during the off-peak billing period 2.955¢/KWH

For the purpose of this Schedule, the on-peak billing period is defined as 7 a.m. to 9 p.m., local time, for all weekdays, Monday through Friday. The off-peak billing period is defined as 9 p.m. to 7 a.m., local time, for all weekdays, all hours of the day on Saturdays and Sundays, and the legally observed holidays of New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

MINIMUM CHARGE

This Schedule is subject to a minimum monthly charge equal to the Customer Charge.

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

PAYMENT

Bills are due upon receipt and payable by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company within twenty (20) days of the mailing date. Effective October 1, 2006, any amount due and not received by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company by the next scheduled read date shall be subject to a delayed payment charge of 1%. This charge shall not be applicable to local consumer utility taxes.

SEPARATE METERING PROVISION

Customers shall have the option of receiving service under this schedule for load associated with energy storage devices with time-differentiated load characteristics and service under Schedule R.S. for general use load. Such general use load shall be separately wired to a standard residential meter.

(C) Indicates Change, (D) Indicates Decrease, (I) Indicates Increase, (N) Indicates New, (O) Indicates Omission, (T) Indicates Temporary

P.S.C. W.VA. TARIFF NO. 12 (APPALACHIAN POWER COMPANY)
P.S.C. W.VA. TARIFF NO. 17 (WHEELING POWER COMPANY)

SCHEDULE S.W.S.
(Sanctuary Worship Service)

AVAILABILITY OF SERVICE

Available for service only to the building in which the sanctuary or principal place of worship is located.

MONTHLY RATE (Schedule Code 222)

Customer Charge	\$ 8.00/month
Energy Charge:	
(I) First 7,000 KWH	6.925¢/KWH
(I) All over 7,000 KWH	5.856¢/KWH

MINIMUM CHARGE

This Schedule is subject to a minimum monthly charge equal to the Customer Charge.

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

PAYMENT

Bills are due upon receipt and payable by the "Last Pay Date" shown on the bill. Any amount due and not received by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company by the next bill preparation date shall be subject to a delayed payment charge of 1%. This charge shall not be applicable to local consumer utility taxes.

TERM

Contracts may be required pursuant to the Extension of Service provision of the Company's Terms and Conditions of Service.

SPECIAL TERMS AND CONDITIONS

This Schedule is subject to the Company's Terms and Conditions of Service.

Religious organizations which have auxiliary buildings, such as classrooms, day care centers, etc., that are separated from the church building containing the principal place of worship and served at one point of delivery through a single meter, shall separate the wiring in the sanctuary building from the wiring in the other buildings and the sanctuary building shall be individually metered in order to be served under this Schedule.

The Company shall have the option of reading meters monthly or bi-monthly.

SCHEDULE S.S.
 (School Service)

AVAILABILITY OF SERVICE

Available for service to all primary and secondary school, college and university buildings and public libraries for which the entire electrical requirements are furnished by the Company.

MONTHLY RATE

Schedule Codes	Service Voltage	Demand Charge (\$/KW)	Energy Charge ¢/KWH	Customer Charge \$/Month
634, 636	Secondary	(I) 4.583	(I) 4.289	15.00
635	Primary	(I) 3.532	(I) 4.157	60.00

MINIMUM CHARGE

Customers with demands below 500 KW are subject to a minimum monthly charge equal to the Customer Charge. Customers with demands of 500 KW, or more are subject to a minimum monthly charge equal to the sum of the Customer Charge, the product of the Demand Charge and the monthly billing demand and all applicable adjustments.

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

PAYMENT

Bills are due upon receipt and payable by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company within twenty (20) days of the mailing date.

MEASUREMENT AND DETERMINATION OF DEMAND AND ENERGY

The billing demand in KW shall be taken monthly as the single highest 15-minute peak in KW as registered during the month by a demand meter or indicator. Where service is delivered through two meters to an existing customer, the monthly billing demand will be taken as the sum of the two demands separately determined and the billing KWH taken as the sum of the KWHs separately determined.

Monthly billing demands for customers with actual or contracted demands of 500 KW or more of capacity shall not be less than 60% of the greater of (a) the customer's contract capacity in excess of 100 KW, or (b) the customer's highest previously established monthly billing demand during the past 11 months in excess of 100 KW.

Billing demands will be rounded to the nearest whole KW.

SCHEDULE S.S.
 (School Service)
 (continued)

METERED VOLTAGE ADJUSTMENT

The rates set forth in this Schedule are based upon delivery and measurement of energy at the same voltage. When the measurement of energy occurs at a voltage different than the delivery voltage, the measurement of energy will be compensated to the delivery voltage. At the sole discretion of the Company, such compensation may be achieved through the use of loss compensating equipment or the application of multipliers to the metered quantities. In such cases, metered KWH and KW will be adjusted for billing purposes. In cases where multipliers are used to adjust metered usage, the adjustment shall be as follows:

- (a) Measurements taken at the low-side of a customer-owned transformer will be multiplied by 1.01.
- (b) Measurements taken at the high-side of a Company-owned transformer will be multiplied by 0.98.

ATHLETIC FIELD LIGHTING

Available to separately metered athletic field lighting facilities. In order to be eligible for the Athletic Field Lighting charges in this provision, a new or existing customer requiring an increase in lighting load must furnish and maintain the required equipment in order to receive the entire service at the primary voltage of the distribution line from which service is to be supplied. Athletic fields receiving service at the effective date of this provision shall not be required to purchase and maintain the required equipment supplying the existing secondary voltage service that is serving the customer's present load requirement at their present location.

Monthly Rate

<u>Schedule Code</u>	<u>Service Voltage</u>	<u>Energy Charge (\$/KWH)</u>	<u>Customer Charge (\$/Month)</u>
698	Primary	(I) 6.106	25.00

TERM

For customers with demands greater than 1,000 KW, contracts will be required for an initial period of not less than one (1) year and shall remain in effect thereafter until either party shall give to the other at least six month's written notice of the intention to discontinue service under the terms of this schedule. Such customers shall contract for a definite amount of electrical capacity sufficient to meet their normal maximum requirements. For customers with demands less than 1,000 KW, a written agreement may be required at the option of the customer or the Company, pursuant to the Extension of Service provisions of the Company's Terms and Conditions of Service.

A new initial contract period will not be required for existing customers who change their contract requirements after the original initial period unless new or additional facilities are required. The Company reserves the right to make initial contracts for periods of longer than one year pursuant to the Extension of Service provision of the Company's Terms and Conditions of Service.

The Company shall not be required to supply capacity in excess of that contracted for except by mutual agreement.

SCHEDULE S.G.S.
(Small General Service)

AVAILABILITY OF SERVICE

Available for general service to customers with maximum electrical capacity requirements of 10 KW or less. When a customer being served under this Schedule establishes or exceeds a maximum requirement of 10 KW, the customer will be placed on the appropriate general service Schedule.

MONTHLY RATE (Schedule Codes 231, 234, 281)

Customer Charge	\$ 8.00/month
(I) Energy Charge	5.972¢/KWH

MINIMUM CHARGE

This Schedule is subject to a minimum monthly charge equal to the Customer Charge.

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

PAYMENT

Bills are due upon receipt. Any amount due and not received by mail, checkless payment plan, electronic payment plan, or at authorized payment agents of the Company by the "Last Pay Date" shown on the bill, shall be subject to a delayed payment charge of 1%. This charge shall not be applicable to local consumer utility taxes.

TERM

For customers eligible for this Schedule, a written agreement may be required at the option of the customer or the Company, pursuant to the Company's Terms and Conditions of Service.

A new initial contract period will not be required for existing customers who change their contract requirements after the original initial period unless new or additional facilities are required. The Company reserves the right to make initial contracts for periods of longer than one year pursuant to the Extension of Service provision of the Company's Terms and Conditions of Service.

The Company shall not be required to supply capacity in excess of that contracted for except by mutual agreement.

P.S.C. W.VA. TARIFF NO. 17 (WHEELING POWER COMPANY)

SCHEDULE S.G.S.
(Small General Service)
(continued)

SPECIAL TERMS AND CONDITIONS

This Schedule is subject to the Company's Terms and Conditions of Service.

The Company shall have the option of reading meters monthly or bi-monthly.

Customers with cogeneration and/or small power production facilities shall take service under Schedule COGEN/SPP or by special agreement with the Company.

LOAD MANAGEMENT TIME-OF-DAY PROVISION

Available to customers who use energy storage devices with time-differentiated load characteristics approved by the Company, such as electric thermal storage space heating and/or cooling systems and water heaters, which consume electrical energy only during off-peak hours specified by the Company and store energy for use during on-peak hours. A time-of-day meter is required to take service under this provision.

Customers who desire to separately wire their energy storage load to a time-of-day meter and their general-use load to a standard meter shall receive service under the appropriate provisions of this Schedule.

Monthly Rate (Schedule Code 225)

Customer Charge \$12.60/month

Energy Charge:

- (I) All KWH during the on-peak hours 9.434¢/KWH
- (I) All KWH during the off-peak hours 2.879¢/KWH

For the purpose of this provision, the on-peak billing period is defined as 7 a.m. to 9 p.m., local time, for all weekdays, Monday through Friday. The off-peak billing period is defined as 9 p.m. to 7 a.m., local time, for all weekdays, all hours of the day on Saturdays and Sundays, and the legally observed holidays of New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

The Company reserves the right to inspect at all reasonable times the customer's energy storage devices which qualify for service under this provision, and to ascertain by any reasonable means that the time-differentiated load characteristics of such devices meet the Company's specifications. If the Company finds that, in its sole judgment, the availability conditions of this provision are being violated, it may discontinue billing the customer under this provision and commence billing under the appropriate general service schedule.

OPTIONAL UNMETERED SERVICE PROVISION (Schedule Code 213)

Available to customers who qualify for Schedule S.G.S. and use the Company's service for commercial purposes consisting of small fixed electric loads such as traffic signals and signboards which can be served by a standard service drop from the Company's existing secondary distribution system. This service will be furnished at the option of the Company.

SCHEDULE S.G.S.
(Small General Service)
(continued)

OPTIONAL UNMETERED SERVICE PROVISION (Cont'd)

Each separate service delivery point shall be considered a contract location and shall be separately billed under the service contract. In the event one customer has several accounts for like service, the Company may meter one account to determine the appropriate kilowatt-hour usage applicable for each of the accounts.

The customer shall furnish switching equipment satisfactory to the Company. The customer shall notify the Company in advance of every change in connected load, and the Company reserves the right to inspect the customer's equipment at any time to verify the actual load. In the event of the customer's failure to notify the Company of an increase in load, the Company reserves the right to refuse to serve the contract location thereafter under this provision, and shall be entitled to bill the customer retroactively on the basis of the increased load for the full period such load was connected plus three months.

(I) Calculated energy use per month shall be equal to the contract capacity specified at the contract location times the number of days in the billing period times the specified hours of operation. Such calculated energy shall then be billed at 5.972¢/KWH plus a monthly customer charge of \$7.35.

This provision is subject to the Terms and Conditions of Schedule S.G.S.

SCHEDULE M.G.S.
 (Medium General Service)

AVAILABILITY OF SERVICE

Available for general service to customers with maximum demands exceeding 10 KW but less than 1,000 KW. When a customer being served under this Schedule establishes or exceeds a maximum requirement of 1,000 KW, the customer will be placed on the appropriate general service Schedule and required to contract for such capacity requirements. This Schedule is not available to customers being served under Schedule L.G.S. as of the effective date of this Schedule except in cases of material changes in load which result in a dramatic change in usage characteristics.

MONTHLY RATE

Schedule Codes	Service Voltage	Demand Charge (\$/KW)	Off-Peak Excess Demand Charge (\$/KW)	Energy Charge ¢/KWH	Customer Charge \$/Month
215	Secondary	(I) 4.732	2.44	(I) 4.739	10.00
217	Primary	(I) 3.714	1.60	(I) 4.603	30.00

239	Transmission	(I) 1.531	0.59	(I) 4.416	80.00

Reactive Demand Charge for each KVAR of leading or lagging reactive demand in excess of 50% of the KW metered demand \$0.62/KVAR
 (Applicable to customers 300 KW or greater)

MINIMUM AND MAXIMUM CHARGES

Bills computed under the above rate are subject to the operation of Minimum and Maximum Charge provisions as follows:

- (a) Minimum Charge - For demand accounts up to 100 KW - the Customer Charge.
 For demand accounts over 100 KW - the sum of the Customer Charge, the product of the Demand Charge and the monthly billing demand, and all applicable adjustments.
- (b) Maximum Charge - The sum of the Customer Charge, the product of 15¢/KWH and the metered energy, and all applicable adjustments. This provision shall not reduce the charge below the amount specified in the Minimum Charge provision above, (a).

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

SCHEDULE M.G.S.
 (Medium General Service)
 (continued)

METERED VOLTAGE ADJUSTMENT

The rates set forth in this Schedule are based upon delivery and measurement of energy at the same voltage. When the measurement of energy occurs at a voltage different than the delivery voltage, the measurement of energy will be compensated to the delivery voltage. At the sole discretion of the Company, such compensation may be achieved through the use of loss compensating equipment or the application of multipliers to the metered quantities. In such cases, metered KWH, KW and KVAR will be adjusted for billing purposes. In cases where multipliers are used to adjust metered usage, the adjustment shall be as follows:

- (a) Measurements taken at the low-side of a customer-owned transformer will be multiplied by 1.01.
- (b) Measurements taken at the high-side of a Company-owned transformer will be multiplied by 0.98.

ATHLETIC FIELD LIGHTING

Available to separately metered athletic field lighting facilities. In order to be eligible for the Athletic Field Lighting charges in this provision, a new or existing customer requiring an increase in lighting load must furnish and maintain the required equipment in order to receive the entire service at the primary voltage of the distribution line from which service is to be supplied. Athletic fields receiving service at the effective date of this provision shall not be required to purchase and maintain the required equipment supplying the existing secondary voltage service that is serving the customer's present load requirement at their present location.

SCHEDULE O.I.
 (Outdoor Lighting)

AVAILABILITY OF SERVICE

Available for outdoor lighting to individual customers located outside areas covered by municipal street lighting systems.

Customers requesting the installation of a new light shall have the obligation to insure that the requested location for the light will not be objectionable to other property owners in the immediate vicinity. In the event of a dispute that results in the removal or relocation of the installation, the customer will be responsible for the costs of removal or relocation.

Customers requesting a light that requires the installation of a new pole on their property may designate the location of the new pole, provided that the pole location is truck accessible to the Company.

MONTHLY RATE

A. Overhead Lighting Service

For each of the following, the Company will provide the lamp, photo-electric relay control equipment, luminaire and upsweep arm not over 6 feet in length, and shall mount same on an existing, truck accessible wood distribution pole carrying secondary circuits.

(I)	130	1,000	88,000	Metal Halide Floodlight	50.83

**Effective July 28, 2006, this lamp is no longer available for new installations or for repair or replacement of existing lights.

When the customer's service requires an underground circuit longer than 30 feet from the existing secondary facilities for post-top lighting service, the customer will pay to the Company, in advance, all costs for the length of underground circuit in excess of 30 feet.

The customer shall, where applicable, be subject to the following conditions in addition to paying the charges set forth in the above:

1. Customers requiring service where rock or other adverse soil conditions are encountered will be furnished service provided the excess cost of trenching and backfilling (cost in excess of \$0.90 per foot of the total trench length) is paid to the Company by the customer.
2. In the event the customer requires that an underground circuit be located beneath a driveway or other pavement, the Company may require the customer to install protective conduit in the paved areas.

(C) Indicates Change, (D) Indicates Decrease, (I) Indicates Increase, (N) Indicates New, (O) Indicates Omission, (T) Indicates Temporary

MONTHLY RATE (Cont'd)

Applicable where the Customer installs and owns the street lighting system within a specified area as agreed to by the Customer and the Company.

¹Effective December 10, 1980, this lamp is no longer available for new installations or for repair or replacement of existing units.

²Effective November 2, 1991, this lamp is no longer available for new installations or for repair or replacement of existing units.

³Effective January 1, 2000, this lamp is no longer available for new installations or for repair or replacement of existing units.

**Effective July 28, 2006, this lamp is no longer available for new installations or for repair or replacement of existing lights.

HOURS OF LIGHTING

All lamps shall burn from one-half hour after sunset until one-half hour before sunrise, every night, burning approximately 4,000 hours per annum.

LOCAL TAX ADJUSTMENT

To bills for electric service supplied within specified municipalities or political subdivisions which impose taxes based upon the amount of electric service sold or revenues received by the Company, as specified on Original Sheet No. 4-1, will be added a surcharge equal to the percentage shown on Sheet Nos. 4-2, 4-3, and 4-4 to accomplish a recovery of these taxes.

APPALACHIAN POWER COMPANY and WHEELING POWER COMPANY COMBINED
WEST VIRGINIA P.S.C. QUARTERLY REVIEW
CALCULATION OF RETURN ON RATE BASE AND COMMON EQUITY
BASED ON ANNUAL AVERAGE VALUES
ACTUAL AS OF DECEMBER 31, 2007

	Amount Outstanding (\$000)	Percent %	Cost Rate %	Weighted Cost Rate %
Long-term Debt	2,764,767	54.95%	5.725%	3.146%
Short-term Debt	155,116	3.08%	5.729%	0.177%
Preferred Stock (Amount Outstanding Includes Issuance Premiums)	<u>18,139</u>	0.36%	4.352%	<u>0.016%</u>
Subtotal	2,938,022			<u>3.338%</u>
Common Equity:				
Common Stock	262,886			
Other Paid-in Capital	993,817			
Retained Earnings:				
Restricted for Bond Indentures	0			
All Other	<u>836,512</u>			
Total Common Equity	<u>2,093,215</u>	<u>41.604%</u>		
Total Capital	<u><u>5,031,237</u></u>	<u><u>100%</u></u>		

Operating Income (Statement 1)	\$	<u>161,140,899</u>	#
Jurisdictional Rate Base (Statement 1)	+	<u>2,315,258,842</u>	
Earned Rate of Return		6.960%	
Weighted Cost Rate - Debt & Preferred Stock	-	3.338%	
Difference - Weighted Return on Common Equity		3.622%	
Return on Common Equity:	3.622% +	41.604%	8.705% #

Note:

Capital structure balances, cost rates and interest synchronization are based on annual average calculations.

Excludes the \$4.782 million deferral of WV Reliability Costs Recorded in Dec 2007
