## COMMONWEALTH OF KENTUCKY BEFORE THE PUBLIC SERVICE COMMISSION

## In the Matter of:

APPLICATION OF ALLTEL
COMMUNICATIONS, INC.
FOR A CERTIFICATE OF PUBLIC
CONVENIENCE AND NECESSITY
TO CONSTRUCT A CELL SITE
AT 14305 OLD U.S. ROUTE 23
SITUATED ON THE DIVIDING RIDGE
BETWEEN NEW U.S. 23 AND
OLD U.S. 23 NORTH OF SAVAGE
BRANCH IN BOYD COUNTY,
KENTUCKY
(NEAL CELLULAR TOWER SITE)

AUG 3 7 KUU JO

Case No. 2007-00305

THE APPLICATION OF CELLCO
PARTNERSHIP D/B/A VERIZON WIRELESS
FOR ISSUANCE OF A CERTIFICATE OF
PUBLIC CONVENIENCE AND NECESSITY
TO CONSTRUCT A WIRELESS
COMMUNICATIONS FACILITY AT 8215
SAVAGE BRANCH, CATLETTSBURG,
KENTUCKY IN THE WIRELESS
COMMUNICATIONS LICENSE AREA IN THE
COUNTY OF BOYD

Case No. 2007-00309

Site Name: Savage Branch

Response of Alltel Communications, Inc to Staff Data Request Dated July 30, 2007

Alltel Communications, Inc. for its Response to the Staff's Request that it address the possibility of consolidating its facilities with the proposed Savage Branch facilities of Cellco Partnership d/b/a/ Verizon Wireless states:

- Alltel's Neal facility is required to in-fill a limited area in its coverage in eastern Boyd County. Specifically, Alltel seeks to extend coverage along U.S. Route
   Mayo Trail, and to provide in-building penetration to the Marathon Petroleum
   Refinery and neighboring homes and buildings.
- 2. In designing and locating the Neal site Alltel, and in integrating the site's coverage into its existing and planned network, Alltel sought to meet its service objectives without creating overlaps.
- 3. Because of the topography of the area and the limited service objectives of the Neal facility, Alltel determined the best coverage would be provided by site close to the target area using a relatively short tower (185 feet). Verizon's proposed Savage Branch facility is located west of and hence further from the area to be served by the Neal facility and uses a 300+ foot tower. The locations of the two proposed facilities and Alltel's target area are illustrated on Exhibit 1 to this Response.
- 4. Co-location of Alltel's facilities onto Verizon's proposed Savage Branch tower will not permit Alltel to meet its service objectives. Placement of Alltel's antennae on the proposed Savage Branch tower with a radiation center of 275 will prevent inbuilding penetration to Mayo Trail and parts of the Marathon Petroleum refinery. To meet these objectives using the proposed Savage Branch tower Alltel would be required to place its antennae at over 300 feet. Alltel believes that placing its antennae on the Savage Branch tower at the height necessary to meet its service objectives would interfere with Verizon's use of its own tower. Attached as Exhibit 2 is a August 22, 2007 letter from Raeleen Matlock and accompanying plots addressing these issues.

5. The Neal site originally was scheduled for completion in 2006. Requiring that Alltel's facilities be placed on Verizon's Savage Branch tower would further delay the extension and improvement of coverage. Verizon's co-location requirements are extensive and in Alltel's experience can take nine months to complete. The resulting lost revenues and costs could total several hundred thousand dollars. In addition, Alltel's customers would be deprived of the service improvements for that period.

Wherefore, Alltel Communications, Inc. respectfully requests that its application to construct the Neal wireless facility be granted.

Dated this 27<sup>th</sup> day of August, 2007.

Respectfully submitted,

Mark R. Overstreet STITES & HARBISON 421 West Main Street

RE: Alltel Proposed Neal Site (PSC Case No. 2007-0039)

Dear Public Service Commission,

This correspondence is to specify the objectives of the proposed Alltel "Neal" tower, PSC Case No. 2007-00305 and the issues associated to the proposed Verizon "Savage Branch" tower, case No. 2007-00309. Alltel's objectives for the proposed "Neal" site are to; extend coverage along US Route 23, Mayo Trail, and to provide in-building penetration to the Marathon Ashland Petroleum Refinery and neighboring homes and buildings.

The "line of sight" characteristic of Alltel's proposed tower location and the higher elevation satisfies Alltel's coverage objectives with a tower of only 182 feet. The location for the proposed Verizon tower will require 300+ feet to obtain the same objectives.

At the Verizon location with a radiation center of 275 feet, the projected propagations show that the terrain will prevent an adequate signal from getting to the east. This will prevent in-building penetration to the Mayo Trail Road, and parts of the refinery.

The Alltel "Neal" site was a 2006 site that has been in the site development process for over a year. The network needs this site to be completed within the next few months to maintain a reasonable schedule.

In conclusion, Verizon's proposed "Savage Branch" tower location will not provide the needed coverage objectives as outlined by the purpose of the proposed Alltel "Neal" site.

With highest regards,

Raeleen Matlock RF Engineer

Alltel Communications, Inc.

Kacleen Markock.
