RE: Public Notice-Kentucky Public Service Commission
Docket No.: 2007-00321

Dear Commissioners:

We have many personal and maybe selfish reasons for not wanting a cell tower built at 910 Old Perryville Loop, Springfield, Ky. Our property joins that site and the tower would be the first thing we would see each morning as we look out our kitchen window. For the past 34 years we have seen trees and farmscape that changes with the seasons.

We do not like the idea of strobe and blinking lights shining in our windows. Also, workers may be going in and out at all hours day and night.

Health risks are also a concern. Have there been long term studies to determine health hazards to individuals who live so close to the site?

This project could also affect our community. It would be located too close to Arnold Airport and could compromise the take-off and landing pattern that has been established for years. The airport is small but, in case of state or national disaster, it could become vital.

A beautifully restored Civil War house is located across the road. It is on the National Historic Register and served as a Hospital during the war. It is believed to be a burial ground for many soldiers and may continue across the road onto our property. These sites must be protected.

Indian artifacts have been found on the site property. We must protect this historical area for generations to come.

We strongly oppose the stated site and request to be notified of any public hearings.

Respectfully,

Harvey Arnold
Kay Arnold
