To account for the current cost of water from South Hopkins' two sources of supply. To determine the pro forma expense test year purchases were priced at the current rates paid for wholesale water, plus, the annual true-up paid to the city of Dawson Springs in 2007 resulting from the annual audit of the city for the fiscal year ended 7/31/07. Also, added is the amortization of South Hopkins' contributions to Dawson Springs Water Treatment Facility Reserve Account. By contract South Hopkins is required to replenish a portion of this account when the account balance is reduced to a certain level. South Hopkins made payment to this account from October, 2002, through December, 2006, in the total amount of \$72,216. These payments are the first such payments in over 20 years. South Hopkins requests to establish this payment as a regulatory asset to be amortized over five years, the anticipated life of the rates requested in this application, resulting in an annual recovery \$14,443.
