RE: Proposed Water Service Rate Increase Made By Overland Development, Catlettsburg, KY

To Whom It May Concern:

I am writing to please request that the proposed rate increase made by Overland Development, Inc. of Catlettsburg, KY be DENIED. I feel that we are already being charged more than enough for our water service. The Lockwood Estate, in which Overland Development operates the water service, has many elderly people and others who cannot afford a raise in water at this time. The economy is in dire straits and now is simply not the time to raise water rates when groceries have gone up, it is a struggle to pay other bills, utilities, and buy any necessary prescriptions.

May I ask that you keep in mind the common people who are just trying to maintain their homes when you make the decision on the proposed water rates.

Thank you for your attention to this matter.
