Subject: Proposed Water Rate Increase

Dear Mr. Riddle:

At their regular Board Meeting on July 18, 2006, the Board of Directors of the Frankfort Plant Board authorized publishing notice of a public hearing on a proposed increase in water rates. A copy of the public notice is attached.

Under the proposed rates, all wholesale customers (Water Districts and Georgetown Water Company) will see an increase of 11.4%. All other FPB water customers have seen an increase of 14%. As a practical matter, an average FPB water customer using 6,000 gallons of water will see the following:

	City	County
Current Rates (monthly)	\$22.17	\$30.73
Proposed Rate	\$25.27	\$35.03
Monthly Increase	\$ 3.10	\$ 4.30
Annual Increase	\$37.20	\$51.60

The water rates per 1,000 gallons to the wholesale water producers will increase 11.4% from \$1.599 to \$1.781 or \$.182 cents for the first 15,000,000 gallons purchased and from \$1.406 to \$1.566 or \$.160 cents for the purchases over 15,000,000 gallons. Assuming that this increase would be passed directly to your customers, an average customer using 6,000 gallons of water would increase \$1.092 per month or \$13.10 per year. As you can see, even though the percentages seem formidable, the actual dollar value of the proposed increases is not all that large on the basis of an average customer. It is also apparent that if the District passes the increase through to its customers the increase to the District's customers will be almost one-third of the increase the Board is requiring of its customers. Obviously, customers using greater than 6,000 gallons would see greater dollar increases.

According to our records, Georgetown Water Company purchased on average of 18,324,900 gallons per month from July 2005 to June 2006. At the increases noted above, this would be a monthly increase of \$3,262 or \$39,144 per year.

Assuming that this increase would be passed directly to your customers, an average customer using 6,000 gallons of water would increase \$1.050 per month or \$12.60 per year. Obviously, customers using greater than 6,000 gallons would see greater dollar increases.

According to our records, South Anderson Water District purchased on average of 2,542,800 gallons per month from July 2005 to June 2006. At \$.175 per thousand gallons this would be a monthly increase of \$445 or \$5,340 per year.

Subject: Proposed Water Rate Increase

Dear Mr. Dees:

At their regular Board Meeting on July 18, 2006, the Board of Directors of the Frankfort Plant Board authorized publishing notice of a public hearing on a proposed increase in water rates. A copy of the public notice is attached.

Under the proposed rates, all wholesale customers (Water Districts and Georgetown Water Company) will see an increase of 11.4%. All other FPB water customers have seen an increase of 14%. As a practical matter, an average FPB water customer using 6,000 gallons of water will see the following:

	City	County
Current Rates (monthly)	\$22.17	\$30.73
Proposed Rate	\$25.27	\$35.03
Monthly Increase	\$ 3.10	\$ 4.30
Annual Increase	\$37.20	\$51.60

The water rates per 1,000 gallons to the wholesale water producers will increase 11.4% from \$1.539 to \$1.714 or \$.175 cents. Assuming that this increase would be passed directly to your customers, an average customer using 6,000 gallons of water would increase \$1.050 per month or \$12.60 per year. As you can see, even though the percentages seem formidable, the actual dollar value of the proposed increases is not all that large on the basis of an average customer. It is also apparent that if the District passes the increase through to its customers the increase to the District's customers will be almost one-third of the increase the Board is requiring of its customers. Obviously, customers using greater than 6,000 gallons would see greater dollar increases.

According to our records, North Shelby Water District purchased on average of 16,166,400 gallons per month from July 2005 to June 2006. At \$.175 per thousand gallons this would be a monthly increase of \$2,829 or \$33,949 per year.

If you desire, I will meet with you or anyone else you wish to attend for the purpose of discussing the proposed increase. The meeting would need to be held prior to the public hearing. The Board hopes that these opportunities for input will help resolve questions you might have concerning the proposed rate and avoid Public Service Commission involvement with its related costs in time and money for both our operations.

The rates proposed in this Notice may be modified by the Commission. Such action by the Commission may result in the rates being higher or lower than proposed by FEWPB.

Mrs. Jean Costigan, Chairman

Frankfort, Kentucky 40601

Subject: Proposed Water Rate Increase

Dear Mrs. Costigan:

At their regular Board Meeting on July 18, 2006, the Board of Directors of the Frankfort Plant Board authorized publishing notice of a public hearing on a proposed increase in water rates. A copy of the public notice is attached.

Under the proposed rates, all wholesale customers (Water Districts and Georgetown Water Company) will see an increase of 11.4%. All other FPB water customers have seen an increase of 14%. As a practical matter, an average FPB water customer using 6,000 gallons of water will see the following:

	<u>City</u>	<u>County</u>
Current Rates (monthly)	\$22.17	\$30.73
Proposed Rate	\$25.27	\$35.03
Monthly Increase	\$ 3.10	\$ 4.30
Annual Increase	\$37.20	\$51.60

The water rates per 1,000 gallons to the wholesale water producers will increase 11.4% from \$1.539 to \$1.714 or \$.175 cents. Assuming that this increase would be passed directly to your customers, an average customer using 6,000 gallons of water would increase \$1.050 per month or \$12.60 per year. As you can see, even though the percentages seem formidable, the actual dollar value of the proposed increases is not all that large on the basis of an average customer. It is also apparent that if the District passes the increase through to its customers the increase to the District's customers will be almost one-third of the increase the Board is requiring of its customers. Obviously, customers using greater than 6,000 gallons would see greater dollar increases.

According to our records, Elkhorn Water District purchased on average of 7,059,600 gallons per month from July 2005 to June 2006. At \$.175 per thousand gallons this would be a monthly increase of \$1,235 or \$14,825 per year.
