David C. Brown
Counsel for The Kroger Company

1 private and public sector clients in the areas of energy-related economic and
2 policy analysis, including evaluation of electric and gas utility rate matters.

3 Prior to joining Energy Strategies, I held policy positions in state and local
4 government. From 1983 to 1990, I was economist, then assistant director, for the
5 Utah Energy Office, where I helped develop and implement state energy policy.
6 From 1991 to 1994, I was chief of staff to the chairman of the Salt Lake County
7 Commission, where I was responsible for development and implementation of a
8 broad spectrum of public policy at the local government level.

9 **Q. Have you previously testified before this Commission?**

10 A. Yes. Earlier this year I testified in the Commission's energy efficiency
11 proceeding, Administrative Case No. 2007-00477. In 2007 and 2008, I testified
12 in the East Kentucky Power Cooperative general rate proceeding, Case No. 2006-
13 00472. In 2006, I testified in the Duke Energy Kentucky general rate proceeding,
14 Case No. 2006-00172.

15 **Q. Have you testified before utility regulatory commissions in other states?**

16 A. Yes. I have testified in more than one hundred proceedings on the subjects
17 of utility rates and regulatory policy before state utility regulators in Alaska,
18 Arizona, Arkansas, Colorado, Georgia, Idaho, Illinois, Indiana, Kansas, Michigan,
19 Minnesota, Missouri, Montana, Nevada, New Mexico, New York, Ohio,
20 Oklahoma, Oregon, Pennsylvania, South Carolina, Utah, Virginia, Washington,
21 West Virginia, and Wyoming.

22 A more detailed description of my qualifications is contained in
23 Attachment A, appended to my direct testimony.

24

1 **Overview and Recommendations**

2 **Q. What is the purpose of your testimony in this proceeding?**

3 A. My testimony addresses the proposed electric rate spread for any change
4 in LG&E's revenue requirement.

5 **Q. Please summarize your conclusions and recommendations.**

6 (1) LG&E's proposed rate spread proposal falls within the bounds of
7 reasonableness at the revenue requirement requested by the Company.

8 (2) If the revenue requirement approved by the Commission is less than
9 that requested by LG&E, then the rate spread proposed by LG&E for its requested
10 revenue requirement should be the starting point for spreading the approved
11 revenue change. Specifically, the revenue apportionment produced by LG&E's
12 rate spread should be used as the basis for spreading any smaller revenue change.

13

14 **Rate Spread**

15 **Q. What general guidelines should be employed in spreading any change in**
16 **rates?**

17 A. In determining rate spread, or revenue apportionment, it is important to
18 *align rates with cost causation, to the greatest extent practicable. Properly aligning*
19 *rates with the costs caused by each customer group is essential for ensuring*
20 *fairness, as it minimizes cross subsidies among customers. It also sends proper*
21 *price signals, which improves efficiency in resource utilization.*

22 At the same time, it can be appropriate to mitigate the impact of moving
23 immediately to cost-based rates for customer groups that would experience

1 significant rate increases from doing so. This principle of ratemaking is known as
2 “gradualism.” When employing this principle, it is important to adopt a long-term
3 strategy of moving in the direction of cost causation, and to avoid approaches that
4 result in permanent cross-subsidies from other customers.

5 **Q. What general approach to electric rate spread does LG&E recommend?**

6 As described by LG&E witness William Steven Seelye, the Company is
7 attempting to bring class rates of return more in line, while taking into
8 consideration the principle of gradualism.

9 **Q. What is your assessment of LG&E’s proposed approach to rate spread?**

10 A. Although it would have been reasonable for LG&E to take a stronger step
11 in the direction of cost-of-service for the classes with relative rates of return
12 significantly divergent from 1.00,¹ I have concluded that the Company’s proposal
13 falls within the bounds of reasonableness at the revenue requirement requested by
14 the Company. Consequently, if the Company’s requested revenue requirement is
15 adopted by the Commission, then I would support the rate spread proposed by
16 LG&E.

17 **Q. What do you recommend if the revenue requirement approved by the
18 Commission is less than that requested by PSE?**

19 A. If the revenue requirement approved by the Commission is less than that
20 requested by LG&E, then the rate spread proposed by LG&E for its requested
21 revenue requirement should be the starting point for spreading the approved

¹ Relative rate of return is calculated by dividing the class rate of return by the total system rate of return.

1 revenue change. Specifically, the revenue apportionment produced by LG&E's
2 rate spread should be used as the basis for spreading the smaller revenue change.

3 **Q. Please explain your recommendation further.**

4 A When I refer to the "revenue apportionment produced by LG&E's rate
5 spread" I am referring to each class's percentage share of total revenue
6 requirement (excluding special contracts and miscellaneous revenues) that results
7 from that spread. For example, under LG&E's proposed spread, Residential
8 customers would pay 41.37 percent of the total revenue requirement exclusive of
9 special contract and miscellaneous revenues. If the Commission agrees that
10 LG&E's proposed rate spread is reasonable, then by extension, the corresponding
11 revenue apportionment is reasonable as well.

12 My recommendation is to retain the percentage revenue apportionment
13 that results from LG&E's rate spread and to apply this revenue apportionment to
14 whatever final revenue requirement is approved by the Commission. This type of
15 approach (determining a reasonable revenue apportionment first, then applying it
16 to the resulting revenue requirement) is standard in some jurisdictions such as
17 Minnesota, and was recently adopted in a proceeding in Washington. The
18 advantage of this approach is that it balances the application of gradualism with
19 moving toward cost-of-service. If there is a determination that a given revenue
20 apportionment reasonably accomplishes this balance, then this balance should be
21 retained for a range of different revenue requirements. My recommendation
22 accomplishes this objective.

23 **Q. Do you have an example to illustrate how your approach would work?**

1 A. Yes. An example is presented in Higgins Exhibit 1. In this example, the
 2 revenue apportionment associated with LG&E's proposed spread is first
 3 determined. Next, we assume that the Commission approves a 2 percent revenue
 4 decrease rather than the 1.93 percent increase requested by the Company. The
 5 resulting rate spread is then calculated by holding the revenue apportionment
 6 constant. The results are summarized in Table KCH-1, below.

7 **Table KCH-1**
 8 **Kroger Recommended Spread Approach:**
 9 **Example Assuming 2% Decrease in Revenue Requirement**

2 **Q. Please summarize your recommendation with respect to rate spread.**

3 A. Although it would be reasonable to set rates closer to cost-of-service for
4 those rate schedules with relative rates of return significantly divergent from 1.0, I
5 conclude that LG&E's rate spread proposal still falls within the bounds of
6 reasonableness at the revenue requirement requested by the Company. If the
7 revenue requirement approved by the Commission is less than that requested by
8 LG&E, then the percentage revenue apportionment produced by LG&E's rate
9 spread should be used as the basis for spreading the resulting revenue change.

10 **Q. Does this conclude your direct testimony?**

11 A. Yes, it does.
