PUBLIC SERVICE
COMMISSION

To: Ky Public Service Commission

I, Tammy Price would like to give my opinion about Ky Power's proposed rate increase.

I think that a 35% increase on residential customers is very unfair. My electricity bill is already high. My last one for my home was over \$181.00. My power went out on Dec. 19 and was not fixed until the Monday after Christmas, the 28th. The power went out again on New Years Day for about 2 hours. Day before yesterday, it went out about 7pm and came on about 3 or 4 am. I went to work and it went out again yesterday about 7:15 am.

They say part of the reason for this increase is green technology. They are still only able to use coal. Until green technology actually works, I don't think we should have to pay for it.

334 Daniels Branch
Pikeville, Ky 41501

Thank you,
Tammy Price
