Public Service Commission

As a customer of Ky Power I urge you not to grant a increase of any kind. According to local television they want this increase in part to the major power outage of late. This is a cost of doing business expense. I agree this was a major expense but preventive maintenance would have saved a lot.

If you grant this increase the people are going to get hit by raises from Ky Power and everybody else doing business because these companies are going to pass these raises on to the people.

Right now there is thousands, maybe hundreds of thousands that have to choose either heat or food. If you grant this increase you will be adding thousands to that list. Don't grant this increase

Thank you
Danny Conley
