My Voice on Ky. Power Raise
A few years ago you could see trucks
out repairing line cutting right of ways and
setting post where needed. Now the only time
you see a utility truck is when the
electric goes off we had a post about
Broke down and our electric went off
real often took us a year to get it
Replaced. What is all the money we pay
now going to. They have been charging
a huge amount & adding on fuel A.S.J that
pushes our electric bills so high we cant
hardly make it now. take my self, my husband
Past away 16 years ago my son had been
running a Family Business Rebuilding starter and
alternator he is still running it in a Bldg
that is so run down the Roof leaks the
Gutter has falling off I own the Bldg but
can not come up with Repair money I ~~draw~~
Draw 557 Dollars social security after
Medicare & a very cheap med. card come out
294.94 Comes out of that for insurance on the
old Bldg & my house which is almost as Bad a
shop as the shop. my son has a wife & 2 children
in school age and the electric is running over
4 hundred now this Raise will close us down
he tries to give me what he can to keep me

going I am 77 years old and what little I get from my son & the little I have left over ~~is~~ on my social security is all I have to live ^{on}. My son has major health problems and still tries to work his home is on the property where the shop is which is a old trailer. this Raise will put him out of Business it will raise the electric Bill to six or 7 hundred Dollars with Business slow & so many people out of work they will be cutting Peoples electric off ever where & people will be starving & freezing why are they allowing this with so many people out of work & times so hard. this will close small Business & put more people out of work with more people looking to the state and government to help them. When the electric lines and posts were being cared for and right of way cleaned we did not have these major outages they are not doing their job & crying for help from the government & the people. so let starve people to death to bid them out we did it for the Bonles why not them Katherine Williams a Ky. Power customer
