To whom it may concern,

I have a house hold of three, me, my husband and my 17 month of daughter. We are only home in the evening, due to us being at work. Nothing is on or plugged in while were gone, and to beat it all we live in an apartment and we pay from \$134.00 or more a month. That's ridiculous for a very small apartment. We can barely afford our rent and other bills plus this way too high electric bill. Maybe if I lived in a bigger place such as a house or something I might understand it. But that's not the case.

THIS NEEDS TO BE CHANGED AND NO MORE RATE RAISES.

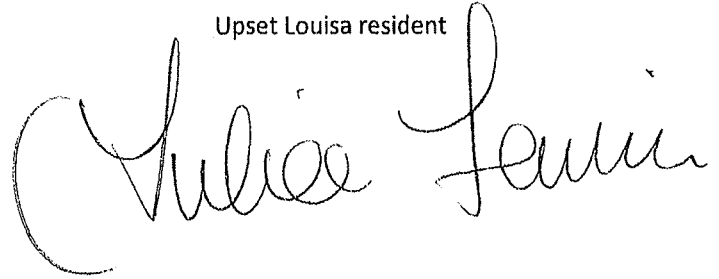

If this is happening to raise their pay that's VERY selfish of them, I wish we could get raises period just to be able to pay our bills. I guess we will all go to candle light or gas just so we can get by.

I work with many and many of people that are struggling to make it and this is not helping.

I hope we can be heard in this matter,
