To Whom It Shall Concern:

This letter is to address your recent request for residential increase in our electric bill. As senior citizens age 65 and 69 this increase will create an extreme hardship on us.

Having been self-employed our working years, we have no pension to draw from and basically live on social security and a meager savings. We have no computer in our home. Thank God for Medicare or we would have no hospitalization. We have no prescription coverage and that is a constant worry.

Please consider what you are doing to people stretched to the limit now and cannot afford this increase. Exempt those age 65 and older or at the very least impose in some guidelines on people.

Thank you,  
Ronald & Jan Fultz
