Case: AEP's Proposed Rate Increase

COMMENTS: With the new federal & state taxes, along with more federal taxes to be implemented to pay for our huge national debt, not counting the mandatory health insurance that people cannot afford to purchase, will put everyone in a financial hardship. It appears that AEP has been making a more than fair profit already to pay out such salaries as in nearly a million for the CEO plus other high ranking staff & still show huge profits. It appears that AEP is extremely greedy -- they need to do what the federal government needs to do -- tighten their belts & be more conservative instead of coming to the consumer "taxpayer" as if the consumer was a bottomless well of money.
