To Whom It May Concern:

Kentucky Utilities is asking for an increase. We the people should not have to pay for the acts of Mother Nature. There is cost saving K.U. can do not to increase the 13 % increase during the economical times we are having. We the people are not getting pay increases to pay such high bills, especially during the winter months. So please think of the people and let them (K.U.) think of ways to cost save the company so it does not hurt the consumer.

I work for a utility company we are \$230,000.00 under budget to date and we had a cost savings of \$300,000.00 to date. So I know it can be done. So please do not pass such an increase at this time. Let Americans recover!!

Thank you,

Melissa Waite
