RE: RATE INCREASE

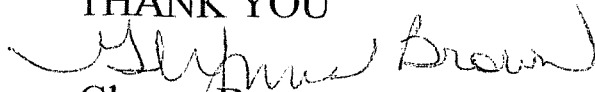

This letter is to **OPPOSE** the requested **RATE INCREASE** for KU services.

I realize costs of services, labor and other expenses may have increased for the KU, **BUT** I know that increasing the rates and deposits will pose a hardship on customers, who have no choice in their electric provider.

KU has a monopoly on electric services as there is no other provider (unlike phone, television or internet providers) that the public can switch to --in order to save on the electric bill.

Perhaps KU can reduce costs in other areas in order to cut expenses and not increase electric rates.

THANK YOU
