Dear Sirs:

Recently we received a letter concerning the proposed to raise electric rates by Ky. utilities.

usually we "go with the flow" "tightening our belts" as needed along the way. But enough is enough. we are 83 + 85 years old, on a fixed income and struggling to pay our mountain of medical bills and the rising food and utility bills each month.

we know there are others less fortunate than we are. young couples with growing children must really be in a fix.

The proposed \$11.70 increase per month for residents is way, way way too much.

Please try to come up with a better solution.

Sincerely

Fred + Edna Manley
