Dear Kentucky Utilities Company,
I was very shocked to read your customer notice
letter about your increase and late fee of \$3.25.

I've notice my electric bill has been going up
and up over the last years. my use to be around
35- 45 dollars but started going up not know why.
I live in a 1 bedroom trailer heat with coal and
have storm windows on my windows and changed
light bulb to the low energy ones as well with the
4 you company sent. But do not know why so
high electric bill still.

I was without power for 4 days yet my electric
was almost \$70⁰⁰ dollars lost all food in fridge
due to power outage and my computer.

The increase of your rates are wrong
People are having hard enough time now,
and more only hurts the people on low income
Food prices, gas prices, and school tax and land tax
as well water.

Why so high for residential customers 13.54%
or almost 12⁰⁰ dollars more a month would be to hard
The working low income people are trying to
keep what they have which is hard to do now
days with job lost, low income wages or
people living on social security or Va Pension trying
to live on that. Please people do not need
a increase on electric services too.

Thank you
Judy Wilson
