Dear Sir,

I'm writing in reply to  
raising our electric.

I am on a fixed income.  
I draw \$694.00 a month. I  
am still paying on my home.  
The city taxes has gone up.  
Ins. on my car has gone  
up. water has gone up.  
~~and~~ Gas has gone up.  
Now electric.

We did not get a  
raise on Social Security  
this year.

I know this is my  
problem. If I have to lose  
electric and go back to kerosene  
lights, wood heat and ect.

like the old days. Then the  
electric company too will lose  
one customer and no telling  
how many more that is on fixed

income will have to do the same. I know you as a company has your problems and it's necessary to raise electric. The government has ~~for~~ programs to help people like me, but the economy has so many people needing help they are not getting enough funding to help every one.

I try hard to take care of my own needs. I've always tried to pay my own bills. It's getting harder all the time. So any help you can give keeping the electric down for people like me would be a big help. I use as little electric as I can.

Thank You  
Ernestine Russell

May God Bless Us All
