PUBLIC SERVICE
COMMISSION

I am responding to the proposal of KU's adjustment of its rates and charges. I think this is appalling. Their rates have constantly risen over the last several years and not in small hikes in price changes. What about people on fixed incomes or those who live with very low incomes? These are the people it will hurt the worse. Others in the middle class families that can barely make ends meet will also be affected. I oppose this proposal and think it should never be allowed to happen.

Sincerely, *Heinice White*
