To whom it may concern:

I received the enclosed notice from Kentucky Utilities and it disturbs me greatly. Louisville Gas & Electric purchased KIL several years ago and until that time things apparently were going good with ~~the~~.

This letter disturbs for several reasons: 1) people in these Kentucky counties are struggling as it is and now they want to raise the rates.

2) It looks like residential rates are getting the highest increase, with the exception of the all district schools, they have the highest, but the residence pay high school taxes so as a result the residence pay the highest rate — 13.54% is unbelievable and on top of that deposits are 19% + 5.7% where

are the people going to get the money to pay if rates keep rising up & wages go down.

Counties are strapped as it is. Let's freeze rate likes to the big companies until out loans are straightened out, that way every one does their duty.

If we the payers have to struggle, let the big companies stop the waste & struggle a little -

If an Audit was done, I'm sure there is enough waste to cover their needs -

Thanks, for listening and hope,
Reading this -
