PUBLIC SERVICE
COMMISSION

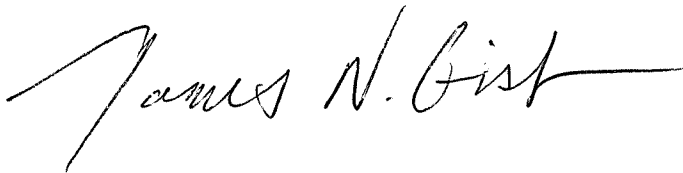

To: Members of the Public Service Commission

Gentlemen and Ladies,

It has come to my attention that LG&E and perhaps others are proposing to raise rate on gas and electric in their service territories. I shall only speak to natural gas. which has fallen since 2008. While the price in recent months has returned to five dollars a dekatherm range, this due to the winter heating season. Hence, in March when temperatures moderate natural gas shall fall. So to make this letter short, I would refute with many facts the need for a rate increase on natural gas. Therefore, I ask that you set aside this portion of their request.

Sincerely,

James N. Gish
