Whoever....

How dare you even entertain the thought of a rate increase on utilities at this time of dreadful economic woo!!!!!!

The LGE proposed increase of 12.1% on electricity and 7.7% on gas is outrageous and preposterous!!!!!!

I have not had an increase on my pension in 16 years. There has been no increase on my Social Security in 2 years. What's left of my 401K won't even pay to bury me. There has been no upward COLA adjustment in years and my savings are tapped on a regular basis just to keep me from sinking.

I consider myself to be among the overwhelming majoring sharing the same economically challenged boat... SOOOO how in the world can you even CONSIDER such a totally unreasonable request???????????

LGE should reduce their profits to the bone and literally have just enough left over to keep their own lights on before they even hint at asking for a nearly 20% increase. The very thought that they had the audacity to yet ASK is beyond me. They should also 'make do' and 'improvise' as the majority of customers are already doing.
