TO WHOM IT MAY CONCERN:

I oppose the increase for gas and electric by the Louisville Gas and Electric Company. An 8.75% increase in gas and a 12.19% increase in electric are absurd.

Our utilities are high enough now. A person, such as myself, who lives on fixed income is having a hard enough time with the bills currently, little lone these outrageous increases.

Every time we, the customer see these increases they are "proposed". Then, next thing we know, they are on our bills. Do we, the people in this community have any say in these rate increases. Not only are these rates going to be raised but our water and cable companies have just raised their rates. Is there never any end to everything going up and no increases in our income. The proposed tariffs text changes are stated and hardly anyone knows what on earth they mean. I guess that's why you always get your increases. Most are ridiculous! Consider this letter my request for an explanation of each of these proposed tariffs text changes.

We, the people of this community, are at your mercy. Lord help us!

An irate customer,

Wanda Eberle
