CASE NUMBER 2009-00549

PUBLIC SERVICE
COMMISSION

To Whom It May Concern:

We are writing to register a complaint regarding the LG&E proposed rate increase as referenced by above case number.

We want to go on record as being opposed to the way it intends to bill its customers a higher flat fee rate instead of by the amount of gas a home uses. Also, wanting to triple its electric customer charge.

In this day and time when there are those of us who must watch our money very closely. A lot of people are trying to be very conservative and watch their utility usage. Changing the kinds of light bulbs we use, unplugging appliances, etc. when not in use, not using the dishwasher, dryer, washer, etc. until we have full loads. These are things we can all do to try to conserve. However, with these kinds of increases we have no control. Also, since they are the only "game in town" we have no choice either.

Please take this into consideration when making a decision regarding this case.

Thank you for your time and help.

Sincerely,

Robert R. Brower
